No software to install.
No hardware to maintain.

When it comes to the growing variety of devices connecting to your network you need less challenges, not more.

Introducing GoGuardian DNS, a unified and scalable cloud filtering solution built to help keep all of your users safe. It has been designed to filter all student and staff devices regardless of their platform, including BYOD and guests on your network.

GoGuardian DNS makes your life as an administrator simpler by providing an easy, inexpensive way to scale your filter when your network grows. You no longer have to worry about replacing inline filtering hardware to meet your network demands. Existing GoGuardian Admin customers enjoy a unified filtering experience and save time by reusing active policies. Additionally, GoGuardian DNS with AdDeflect™* has the power to block digital ads, reducing distractions, increasing students' privacy and saving network bandwidth.

Unified Interface
Provides a simple unified interface for configuring your filtering policies.

Scales Automatically
Scales to meet network demands, without the need for additional hardware.

User-Friendly Reporting
Understand network traffic with easy to read reporting functions.

Device Agnostic
Filters school-issued devices, as well as BYOD and guests on your networks.

Reduces Student Distractions
Block digital ads on web pages and YouTube with AdDeflect, reducing distractions.

Student Safety Features
Enforces safe searches on Google, Yahoo and Bing.
