

## Service Overview

### Admin

- Easy and efficient to manage users, regardless of device type, OS, or browser.
- Create a safer online experience with powerful filtering capabilities.
- Advanced technology that scans docs, mail, social, search, and web content.
- On and Off-Campus Filter: Set different rules based on time and device location.
- Assign, track, and recover devices.
- Allow parent access to browsing reports and at-home filtering.

### Teacher

- By providing a view into students' online activity and providing educators control over their devices, educators can eliminate distractions, connect with students, and save time.
- View Student Screens. See what students are working on, and easily identify students that are struggling or may need more guidance.
- Limit Student Browsing. Block specific websites while keeping the internet open, or restrict students to only the websites you choose—perfect for testing.
- Direct Chat & Announcements. Deliver instruction to the whole class, or chat privately with individual students without disrupting the rest of the class.
- Platform includes:
  - Video Conferencing. Meet with students one-on-one, or initiate a group call to collaborate with the whole class.
  - Screen Sharing. Share your screen with the option to enable audio and/or video to walk students through a lesson.
  - Lesson Recording. Record your one-on-one calls, group calls, or screen-sharing presentations to distribute later.

## Beacon

- GoGuardian Beacon is designed to help identify students who are at risk of suicide, self-harm, or possible harm to others. It can alert the right responders to get students help and quickly activate your school's response plan.
- Optional: Choose 24/7 escalation for Active Planning alerts.

### **Key Features:**

- Identify students engaging in suicide or self-harm content online (including through Search).
- Identify searches for guns and bombs, violent acts, bullying, and cyberbullying.
- Get alerts with context, screenshots, and past activities for faster, more- informed responses.
- Activate the right responders with a customizable escalation list.
- Create faster response plans with insights into the phase of suicide and self-harm activity a student is engaged in.

## Why GoGuardian Beacon

Suicide rates are at epidemic levels, and it's not always easy to identify students in crisis. Schools across the country are using Beacon to help identify students who are silently suffering or at risk of harm so that they can get the help they need.

## Commonly Asked Questions

### How many schools and students does GoGuardian service?

GoGuardian products are used in 10,000+ schools and service 8 million+ students. We are happy to share case studies of schools that use GoGuardian products.

### Isn't GoGuardian a Chromebook-only company?

No! GoGuardian products work on a range of devices, including Chromebooks, Windows, and others.

## Are there any prerequisites for deploying GoGuardian products?

Deploying on Chromebooks or Apple computers requires Superuser access for Google Admin Console. Additionally, on Windows devices, setup requires administrative access to Active Directory.

## Do you offer support for implementing and using GoGuardian?

Yes. We have a wonderful customer success and implementation team to make sure you get the most out of the product. In addition to the comprehensive setup guides, online training, extensive support documentation, and webinars, admins can access immediate chat support whenever questions arise.

## Overall Advantages
