Makerspaces

Makerspaces are becoming the favorite way to bring STEAM learning to the classroom. Research shows that makerspaces help elementary students develop critical thinking, design thinking, and problem-solving skills. The Douglas Stewart Company has many makerspace options to help schools get started or expand their makerspace. Check out how our Makerspace offerings fit into the classroom by hovering over each Makerspace icon.

Collaborative Classroom

Collaboration is a key skill in today's workforce and students are being encouraged to develop this skill at an early age. Classrooms are incorporating collaborative work spaces with desks that can be rearranged easily and technology to help students share their work. Check out what products we have for collaborative classrooms and how teachers can incorporate them in their classroom by hovering over each Collaborative Classroom icon.

Media Rich Classroom

With a large focus on STEAM, students are being encouraged to develop creativity skills and teachers are looking for new ways to show students advanced concepts. Video creation and editing, virtual field trips, and digital art are tactics teachers are using to encourage students to get creative. The Douglas Stewart Company can help you understand what products make sense in a media-rich classroom. Hover over each Media Rich Classroom icon to see what's offered.

VEATIVE

Bringing Learning to Life with VR
Unlock the Power of Immersive Technologies

EduPro VR Headset with Contoller
DSC# 128420 | Vendor# EduPro VE-EP128 | SRP $399.00

Retention
Research suggests that visualization and a VR environment strengthen the connection between a student and a concept, heightening retention.

Engagement
It is about students participating in the learning process, having actual/ virtual experiences, and enjoying the process, which heightens engagement.

Distraction-Free
When students are inside a virtual environment, they are far less prone to distractions such as other students or phones.

Learn More »

Therefore, Veative has developed over 550 curriculum-aligned, interactive VR modules on STEM topics and language learning to transform the way students learn. Veative's learning management platform provides personalized user profiles and actionable analytics to measure students' progress.

Focus on the Discussion with Automatic Whiteboard Image Capture

Improve Classroom Engagement and Productivity

Makerspaces

Collaborative Classroom

Media Rich Classroom

Students need accessible reference materials to improve comprehension

Reviewing class notes helps organize the relationship between ideas, assists in understanding, and improves learning.

...But whiteboard notes are hard to see and to copy

Studies have shown that note-taking during class reduces learning because it results in split attention.

Kaptivo automatically captures whiteboard notes for saving, sharing, and studying

Use the Kaptivo whiteboard camera to enable student engagement, not note-taking. Attached to the top of any whiteboard, the camera automatically saves images and shares content in real time via livestream on any device.

- Quick to install and effortless to use
- Images are enhanced to remove reflections, glares, or people
- Download single image or multi-page presentation

Shaping future problem-solvers, one block at a time

KOOV is the all-in-one coding, robotics and design kit that combines digital coding with physical building to teach the next generation of problem-solvers and innovators.

1 Play

Help students unlock their creativity by constructing colorful 3D robots from included Robot Recipes or their own original designs. If they can imagine it, they can build it.

2 Code

KOOV teaches students coding skills to bring robots to life. Directed by engaging, in-depth content, children will go beyond simply building to truly understand how to turn ideas into reality.

3 Create

Students can apply their skills to original creations and share online. KOOV provides a safe, well-supervised community to post work, download code, and get inspired by fellow creators from your school or around the world.

KOOV Robotics and Coding Kit

Ideal for the classroom, KOOV Robotics and Coding Kit is a comprehensive solution for STEAM education with everything needed to start building robotics and making them move with code. It empowers students to achieve a deeper understanding of programming logic. KOOV also meets various education standards.

PowerGistics

INNOVATIVE DESIGN
THINK OUTSIDE THE CART

Towers by PowerGistics are designed with the future in mind. Devices and classroom layouts are ever changing, so the technology deployment will always be changing as well. That's why Towers by PowerGistics are built to evolve to meet changing deployment needs.

Makerspace and media-rich classrooms are the perfect spaces to incorporate PowerGistics Towers. Whether a student is using a STEAM product requiring an app on a device to function or using a laptop with video-editing software, PowerGistics can be utilized to store and charge the devices.
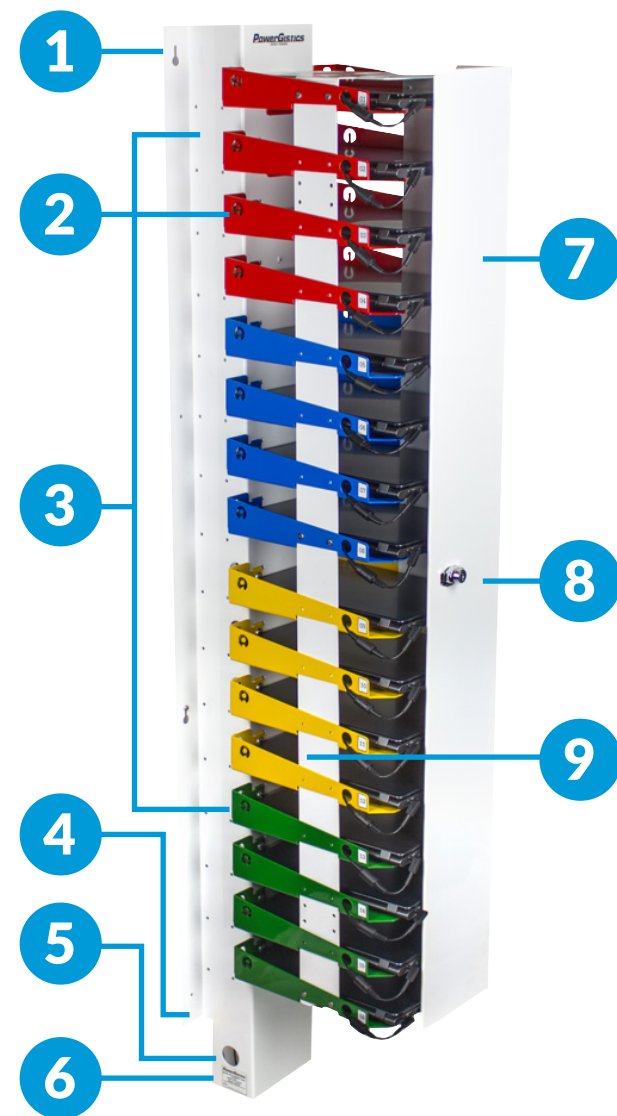

▪ **Makerspaces**

▪ **Collaborative Classroom**

▪ **Media Rich Classroom**

KEY FEATURES OF TOWERS BY POWERGISTICS

1. **Anchor Keyhole**
   Anchors the spine to the wall, while still allowing access to the back side by lifting the Tower and pulling forward.

2. **Cable Management Eyelet**
   Eyelet is used to lock each cable, allowing students to plug in devices without loss or damage.

3. **Custom Shelf-Color**
   Wall-mount Towers are available in 8, 12, 16, and 18-shelf configurations. The 4-color option allows for a visual boost.

4. **Baseboard Cutout**
   Cutout allows for seamless placement against the wall and floor.

5. **Power Cord Access**
   Convenient access while hiding the 12-15ft power cable.

6. **Floor-standing**
   Floor carries the weight while the wall mount keeps the Tower upright.
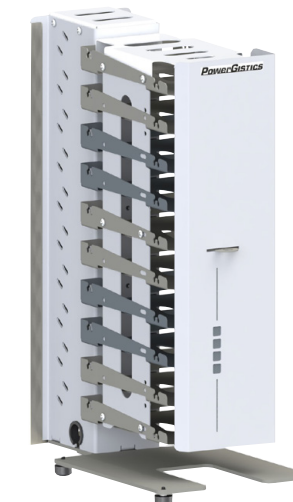

7. **Open-concept Door**
   Quick visual inventory of devices, while steel door ensures security.

8. **Keyed Lock**
   Two-position lock that requires a key to unlock door.

9. **Side Strips**
   Locks shelves into place and eliminates device access from the side.
