WHAT IS THE PRODUCT?

Makey Makey: An Invention Kit for Everyone is an invention kit designed to connect everyday objects to computer keys. Using a circuit board, alligator clips, and a USB cable, the toy uses closed loop electrical signals to send the computer either a keyboard stroke or mouse click signal.

FEATURES

- Online lessons and support on Instructables
- Flexible solution for STEAM learning
- Gamify the learning experience
- Teach students the basics of coding and engineering

WHO IS IT FOR?

- Elementary Teachers
- Secondary Teachers
- STEAM Coordinators
- Home Schooling
- Hybrid Classroom Teachers
- Special Education Teachers

WHY DOES IT BENEFIT EDUCATION?

- Lessons and Google classroom resources
- Flexible tool for STEAM learning
- Online community

$49.95 Makey Makey Classic

$699.95 STEM Pack (Classroom Invention Literacy Kit)

Makey Makey®

THE INVENTION KIT FOR THE 21st CENTURY

HOW DOES MAKEY MAKEY WORK?

Makey Makey works through opening and closing circuits, just like any other button. Instead of the circuit being closed underneath your keyboard, the circuit is closed through the conductive objects you connect with alligator clips. When the circuit is closed, the Makey Makey sends a command to your computer, just like a button pressed on a keyboard.

WHAT OPERATING SYSTEMS CAN MAKEY MAKEY WORK ON?

Makey Makey works on Windows, Mac, Chromebook and on many flavors of Linux (Ubuntu, etc.). If the device supports a USB keyboard or mouse, it should work with Makey Makey.

DOES MAKEY MAKEY WORK WITH MOBILE DEVICES & TABLETS?

Makey Makey is designed to work with QWERTY keyboard and mouse click input. It works on some tablets and mobile devices, but it is not officially supported. For more on iOS compatibility, see our blog.

IS IT SAFE TO USE MAKEY MAKEY AROUND WATER?

Makey makey is designed to be safe to use around the water, but the board and your computer should never be submerged in the water.
