

# IPEVO

## Tools for the Connected World

### WHAT is the product?

IPEVO document cameras are simple, intuitive, flexible, affordable and let teachers deliver interactive and highly engaging lessons. With IPEVO's free and paid software apps, IPEVO doc cams can do the job of an overhead projector, a scanner, a digital camera, chart paper, and even an interactive whiteboard. Teachers can even turn their smart phones into a doc cam with the IPEVO Uplift Multi-angle Arm.

### WHERE does it stand out?

- IPEVO designs its products by watching how teachers use document cameras in the classroom, allowing IPEVO to create intuitive doc cams that gives teachers the right features to do more at a lower price.
- IPEVO doc cams are plug & play and require no installation.
- High-quality audio and video performance.
- Lightweight and wireless options for easier portability in and out of the classroom.

### WHO is it for?

- Primary, Secondary, and College Teachers of all subjects
- Special education and ESL teachers (can help keep students literally on the same page)

### WHY does it benefit education?

- Enhance interactivity and collaboration in all learning environments
- Use as an assistive teach tool for students with emotional/learning disabilities, sensory issues, low-vision, or students with ADHD.
- Puts lesson content and materials front and center and in focus for students
- Display materials for group learning with auto-focus and zoom functions
- Recording videos for classes
- Helps students view a whiteboard, physical materials, or demonstrations

MORE INFORMATION

## IPEVO Document Cameras

- Can be used with video conferencing tools that are UVC-compatible, including Zoom and Google Hangouts
- Teachers can easily switch from webcam view of themselves to a document camera view of the teaching materials
- Free and paid software apps help teachers make lessons and materials interactive, with tools to:
  - Stream and edit on live images onto a computer or tablet
  - IPEVO's accessibility app provides additional assistive tech needs.

## IPEVO Uplift Multi-Angle Arm for Smartphones

- Pair Uplift together with the IPEVO iDocCam app to share a smartphone's video feed onto a big screen, tablet, or computer
- Teachers can use the iDocCam app as a standalone app to view and adjust the live images captured by a smartphone or pair the iDocCam app with the IPEVO Visualizer software installed on a computer or tablet) to turn a smartphone into a doc cam

## Frequently Asked Questions

### *How can IPEVO address special education needs?*

IPEVO's accessibility app provides keyboard accessibility, reading aids, voice-over support, and a text-to-speech converter

### *What is the learning curve?*

IPEVO document cameras don't have a steep learning curve, and most teachers find doc cameras are a natural fit for in-class, remote, and hybrid learning environments. Plus, these doc cams are plug & play and require no installation.

### *How easy is it for students to collaborate with doc cams?*

IPEVO offers wireless options that make it even easier to share content and collaborate from anywhere in the classroom and to bring the document camera between home and school.
