Recommended retail prices, excl. VAT

MindManager 2017 for Windows for individual users: Customers can use MindManager as a virtual whiteboard for brainstorming ideas, personal productivity and project planning due to its flexibility and visualisation features. Beyond mind maps, additional diagram types can be developed to capture and structure information. A major benefit is the integration with Microsoft Office, which enables users to synchronise and export information, i.e. synchronisation of tasks between Outlook and mind maps, or quick and easy export to Word or Excel. The visual layout, together with the calculation function or Gantt-charts, support business requirements, such as project schedules, competitive research, budget assumptions and strategic priorities.

NEW in MindManager 2017 for Windows:

- Simple export of maps in HTML5 to easily share maps with everyone
- Improved file management
- New image library
- New tools, especially for flowcharts
- New template: Timeline layouts
- New features for task and project management
- Zapier: Import data from the most common web apps, now also available for MindManager single users.

Upgrade Protection Plan is an annual subscription (with automatic annual renewal) that protects the customer's investment in a MindManager single licence. Customers covered by the UPP will receive new feature releases, including major upgrades, for MindManager for Windows and MindManager for Mac during the life of the subscription. Telephone helpdesk support is available during normal business hours.

Mindjet MindManager Enterprise for teams and enterprises:

MindManager Enterprise offers powerful capabilities for coordinating projects, managing tasks and sharing knowledge across organisations to improve communication and collaboration in teams and workgroups. Combining all the MindManager for Windows features, the MindManager Enterprise users also benefit from:

- NEW: MindManager Enterprise 2017 for Windows
- New SharePoint Linker to also synchronise task categories and support all common authentication methods
- NEW: MindManager Server App for SharePoint
- NEW: MindManager for Mac v.10.5
- Additional Preview Reader for Windows and Mac
- NEW: Enterprise Admin Setup supports simple large scale deployment on the customer network
- NEW: Advanced project scheduling functions
- NEW: Map Rollups: Aggregate topics from other local maps and maps stored in shared network drives to roll up into a dashboard map

MindManager Enterprise is only available within the MindManager Enterprise licence program which ensures volume-related prices to those customers who purchase more than 10 licences. This includes an easier volume band pricing, a consistent licence key for each purchased licence and simplified software distribution within companies due to a special Admin-Setup. The purchase of **Mindjet Assurance and Support Services (MSA)** is mandatory. MSA offers additional support service and gives access to all MindManager feature updates as soon they're released.
