Upgrade for the Latest in Camtasia
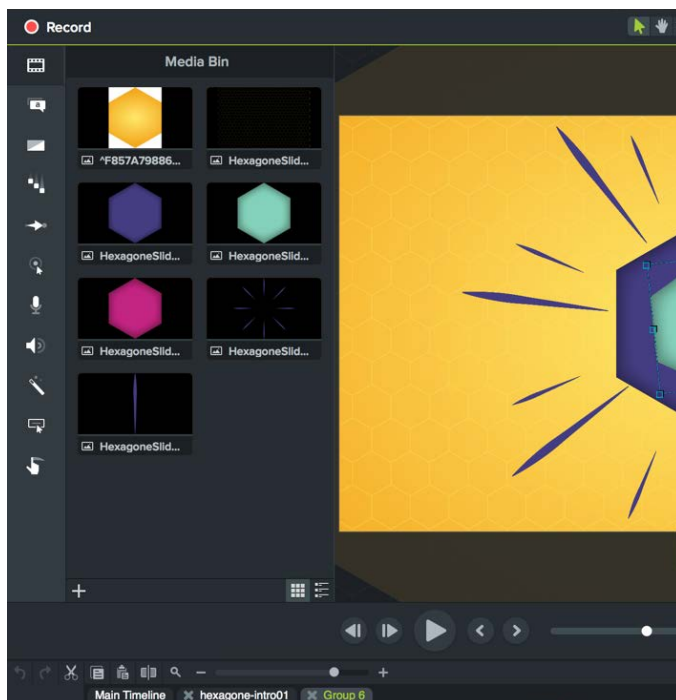

Quickly create videos with consistency

Library
Easily organize assets by different video types, brands, etc. Conveniently keep the same look for future videos.

Theming
Create, save, and organize multiple themes with custom colors and fonts, so they're always ready to use.

Better performance. Faster results.

Editor performance improvements
Enjoy a smoother editing experience with better responsiveness and greater stability in preview playback.

Up to 50% less production time
Get faster rendering times – even on your most complex projects.

Additional updates

Import, edit, and produce at 60 frames per second (fps) for sleeker results.

New behaviors let you animate objects, text, and create engaging transitions.

Assets that make your videos shine

Included with upgrade
Instantly add polish with brand new drag-and-drop assets, so you can start creating videos right away.

Paid assets subscription
TechSmith Assets® gives you more than 600,000 royalty-free stock videos, intros, lower thirds, music, and more.

Contact TechSmith or your preferred reseller to learn more and consider licensing options.
