# SATECHI

## USB-C Products and Computer Accessories for Mac and PC

Satechi was founded in 2005 and has a passion for design, efficiency and love for technology. They provide products and solutions to make everyday life more convenient for the fast-paced world. Each product is crafted with tough and durable materials, while still maintaining a sleek design perfect for the contemporary individual.

### Slim Aluminum Type-C Multiport Adapter V2

Students can seamlessly combine their essential ports into a sleek, compact device for expansion ports on the go. Small but powerful, the adapter adds a micro/SD card reader, USB-C Power Delivery (PD), 4K HDMI, and USB 3.0 ports, all from a single USB-C port. Students can keep it stationed on their desktop or take it with them, as the slim profile is designed for maximum portability.

**DSC# 128628 | Vendor# ST-SCMA2M | Min 1 | SRP \$69.99 | Cost \$37.49**

### Aluminum Type-C Mobile Pro Hub

This hub is designed specifically for 2018 iPad Pro to conveniently access peripheral devices. It features stunning 4K 30Hz HDMI display (2K 60Hz limitation for iPad Pro), USB-C PD 3.0 charging, USB 3.0 (up to 5 Gb/s) and 3.5mm headphone jack, all over a single USB-C connection. With its plug and play design, it is easier than ever for students to connect all their devices on the go.

**DSC# 128620 | Vendor# ST-TCMPHM | Min 1 | SRP \$59.99 | Cost \$31.86**

### Aluminum Laptop Stand

This is the perfect accessory for your students' laptops, notebooks, or tablets. It simplifies and organizes any desk, while maintaining a clean, functional style.

**DSC# 128671 | Vendor# ST-ALTSS | Min 1 | SRP \$29.99 | Cost \$16.24**

## Reusable Perfection for Students That Love to Smile and Love the Environment

### Straws Made for Coffee

KoffieStraw's patented angled design and unique slim opening sit perfectly behind your students' pearly whites to limit stains and enamel erosion. They're made of certified food grade silicone, so they're safe to use in hot drinks (plastic straws can melt toxins into a hot drink). Silicone is non-stick, so users can easily rinse and reuse these straws (or run them through the dishwasher).

These are perfect for your students that love to drink hot beverages or those drinks that would stain their teeth. KoffieStraws are trimmable so students can have the perfect size for their drinks and they are certified no BPA, no lead, and will not melt or leak in hot temperatures.

Protect smiles and the environment with these reusable silicone straws. KoffieStraw is an eco-friendly company not only because of their reusable silicone straws, but they even use home-compostable packaging made of wood pulp (students can put the packaging in their home compost or the normal trash, either way it degrades naturally).

**Koffiestraw is a 3x winner of Amazon's #1 new product in their category!**

#### Reusable Silicone Straws

10-inch (tall) reusable straws. Package includes FREE cleaning brush. Assorted 4Pk colors include: Berry, Brown, Navy, and Sky Blue.

## Kids Can Build Their Way to Victory!

TechTerra Education provides professional development to educators working with students from early childhood to adult through STEM tools training. TechTerra's trainers work with teachers to understand the STEM tool at hand: how to use, why to use, when to use it, and where it fits in the classroom. TechTerra supports the 3C's of professional development: competence, comfort, and curriculum connections.

### SPARKABLES INSPIRATION CARD SET

Spark a students' imagination for designs and inventions using Screenless Idea Creation Cards. Your students, ages 5 and up, will work through the design process. Use this set of word and photo cards along with the design process card to inspire original ideas of inventions to design, create and make recyclable materials or any material you choose. Student imaginations will be ignited, and they'll be ready to create.

DSC# 127115 | VENDOR# DSSPA-1001 | MIN 1 | SRP \$49.99 | COST \$38.88

### FOUNDATIONS OF MAKERSPACES BOOK

The book is written as a step-by-step guide for imagining, designing and creating Makerspaces for K-12. The pedagogy of maker education, STEM literacy, Makerspace management, Makerspace design, using innovative learning spaces, the vocabulary of Making, and Connected Learning are all discussed to help educators who are just getting started or for those who need to upgrade and refresh their STEM spaces. This is a must have for 21st century educators.

# Create the Ultimate Learning Experience

## Wooden connected toys & educational apps for tablets

Marbotic is a French innovative start-up that was founded in 2012 and is inspired by the Montessori method. They create the ultimate learning experience mixing traditional wooden toys and touchscreen technology. Tap into the full interactivity of the tablet screen and make it into a powerful learning tool. With these wooden toys kids are free to play with or without a tablet, to invent their own games, with their own rules.

### Smart Kit

Blending the best of traditional physical toys with modern touchscreen technology, providing optimal learning resources for children ages 3+. Includes both Smart Letters and Smart Numbers kits bundled together for maximum interactive, educational opportunities. Builds on the 3 fundamental pillars of learning (reading, writing and arithmetic), while fostering imagination, creativity and critical thinking skills. DSC# 127106 | Vendor# DSSMA-1001 | Min 1 | SRP \$90.00 | Cost \$77.84

# Scottie Go!

## Discover the World of Coding

**The best way to learn basics of coding is to have fun with it.**

Scottie Go! is an innovative game to teach programming. It is a combination of cardboard tiles, which are used by the players to create programming commands, and an app that sets tasks and scans the proposed solutions that set Scottie and other characters in motion.

The tiles are used to write commands which will be performed by Scottie. They also allow players to acquire basic programming concepts such as loops, conditionals, variables or functions. The app allows users to scan the commands by capturing a photo or a video. Once the command has been scanned, Scottie will carry it out step by step, and the player can see if the task has been performed correctly.

An amazing game for learning the basics of programming.

### SEE IT IN ACTION!

**SCOTTIE GO! MAGNETIC TILES** Tiles provide a teacher aid for basic programming. The Magnetic tiles are compatible with a magnetic whiteboard, and illustrate the basics of algorithm coding, concepts of parameters, loops, and nesting. Also compatible with the Scottie Go! Education App.

DSC# 127100 | Vendor# DSSCO-1002 | Min 1 | SRP \$95.00 | Cost \$82.16

**SCOTTIE GO! BASIC** The BASIC version allows educators to create their own game scenario, working with children in groups, and to let them enjoy algorithmic role-playing. This version is intended for young students ages 5 and up to allow them to code without a computing device.

DSC# 127101 | Vendor# DSSCO-1003 | Min 1 | SRP \$75.00 | Cost \$64.86

**SCOTTIE GO! EDU** This is an excellent learning tool for collaboration, communication and teamwork skills. The concepts students will learn will showcase: composing numbers from digits, addition, subtraction, coding algorithms, controlling characters in scenes, parameters, loops, conditional expressions, variables, and functions.

DSC# 127102 | Vendor# DSSCO-1004 | Min 1 | SRP \$70.00 | Cost \$60.54

**m matatalab**

## HANDS-ON CODING ROBOT FOR KIDS

Develop cognitive abilities, imagination, and coding skills through hands-on play

Let kids learn to code just by playing. No need for a screen, a keyboard or literacy. Kids will program a robot, and create music and art. Matatalab helps young learners understand fundamental concepts to prepare them to grasp more abstract concepts of real programming at higher grade levels in the future.

**SEE IT IN ACTION!**

### CODING SET BOX

Screenless learning tool set allows young learners to naturally play and learn by using their hands, eyes, and ears. Essential for cognitive development, Matatalab created a solution for kids to start coding from a young age. Matatalab teaches students how to code, create music, and art by playing with a screenless, word free, educational game. They receive instant feedback to learn that coding is simple.

**DSC# 127108 | VENDOR# DSMAT-1001 | MIN 1 | SRP \$169.00 | COST \$146.16**

# Award-Winning Educational Games System for iPad®

Create a place where kids explore, learn, create, and interact with digital games in a whole new way.

Osmo enables the iPad® and iPhone® to merge the power of physical play with the digital advantages of real-time feedback. Playing beyond the screen invites students to collaborate on tables or floors while manipulating tangible game pieces such as number tiles, letter tiles, and coding blocks.

Osmo provides a unique gaming accessory that will change the way students age 5-12 learn. Crafted with reflective artificial intelligence, Osmo offers a ground-breaking technology that bridges the real and digital realms. Through experimentation in a stress-free environment and real-time feedback, kids learn that there are multiple good ways to solve a problem. Osmo is an award-winning game system that will change the way your students interact with the iPad by opening it up and hands-on play. It enables the iPad to merge the power of physical play with the digital advantages of real-time feedback. A groundbreaking system encouraging creative thinking and social interaction by expanding gameplay beyond the screen. From phonics to photosynthesis, Osmo lesson plans can be easily integrated into any classroom.

## GAME SYSTEM LEARNING KIT

This kit includes the Osmo Learning Kit and 1 hour of virtual training. The Learning Kit includes everything students need to experience hands-on learning. The kit has 5 games, and included the following products:

- Osmo Genius Kit
- Osmo Pizza Company
- Osmo Coding Awbie
- Osmo Coding Jam
- Osmo Extra iPad Base
- 1 session, 60 min online training

VEATIVE

# Virtual Reality in the Classroom

It's time to go beyond. The VR is a uniquely personal experience which is a distraction-free, non-judgmental, and safe environment. It's time to leverage that environment to allow students to connect with complex, abstract concepts, while also connecting teachers to students via analytics. Curriculum-aligned...interactive...beyond.

**SEE IT IN ACTION!**

### EduPro VR Headset with Controller

A top-of-the-line mobile VR headset made specifically for education. Main features include: XR1 chipset (new in 2019, and only for VR), 6GB RAM, massive 128GB of storage, Bluetooth® controller, SD card slot for storage expansion, and one tap Touchpad on the headset (if the controller is lost). Android 8.1 OS, with MDM. Students can easily load their resources. Schools have full control over this device.

**DSC# 128420 | VENDOR# EduPro VE-EP128**  
**MIN 1 | SRP \$399.00 | COST \$343.13**

Veative has developed over 550 curriculum-aligned, interactive VR modules for STEM, plus 104 second language learning (ELL) lessons to transform the way students learn. Veative's platform provides personalized user profiles and actionable analytics, making teacher time more efficient. Go way beyond.

## 2019 Winter Recap

Add a new dimension to the classroom with cost-effective and high-quality 3D printers for students and educators.

Colorful, affordable technology to inspire creative learning and teaching. Hue brings images to life and comes with user-friendly software to provide easy access to all the camera's functions.

HyperGear specializes in iPhone® accessories, cell phone accessories, and popular cell phone holders. They take pride in quality and offer your students the ability to look and feel fashionable without hefty price tags.

Kano is a computer anyone can make™. Their mission is to give young people a simple, fun way to make and play with technology, and take control of the world around them.

These cute phone stands provide your students a way to watch movies, make phone calls, or offer a hand whenever they need it.

Increase secondary focus with active seating. These chairs are ideal for children with ADD or ADHD as they provide an outlet for restlessness and extra energy.

MSI is the most trusted name in gaming and eSports. They are committed to providing gamers with innovative gaming rigs.

Perfect for students on the go. Naztech products include compact high-powered chargers, car accessories, iPhone® accessories, and portable power solutions. These accessories are designed for reliability, convenience, and utility.

Encrypt online data and create a secure tunnel between the user's device and the internet. The VPN shields users from prying eyes and from intrusive ads and online threats.

Paladone is the UK's leading company for wholesale gift supply. Paladone has novelty items your students are sure to love.

Teach kids computer programming with Cubetto, a friendly wooden robot. It is made of tactile and hard-wearing wood and is a guide into the world of coding.

Storex offers the perfect storage solutions for those in need of professional and affordable filing for organized offices and classrooms.

Techlogix is a solutions-based organization dedicated to improving the collaboration experience in the classroom.

## 2018 Fall/Winter Recap

» **T H R E A D   W A L L E T S**

Thread Wallets are stylish wallets and lanyards to match. Thread Wallets provide a stylish way for your students to carry around their IDs and keys.

Stride® is more than awesome pens. They are dedicated to changing lives and doing good in the community.

Makey Makey is an invention kit for everyone. Turn everyday objects into touchpads. It's a simple invention kit for beginners and experts and is suitable for ages 8 and up.

G-Hold changes the way students and teachers hold things. With the G-Hold® in their hand, users can move around the classroom with the freedom to create and collaborate, and teach and learn, all without the fear of dropping their tablet.

Arozzi offers gaming chairs for the serious gamers. Make your students comfortable with these gaming chairs that are built for all-day comfort.

Ultimate Ears are wireless speakers with 360-degrees of awesome audio performance. They're portable, seriously waterproof, and virtually indestructible.

Makeblock is the global leader in STEAM education solutions. Makeblock provides the most complete hardware, software, content solutions, and top-notch robotics competitions, with the aim of achieving deep integration of technology and education.

Keurig® brewers will brew the perfect cup of coffee every single time. Keurig offers a variety of well-known coffees, allowing students to embrace the warmth all day.

## 2018 Summer Recap

Change the way your students experience audio with bone conduction headphones. These headphones deliver unrivaled situational awareness and comfort. These headphones sit on the jawbone and have transducers that guide mini vibrations through the cheekbones to the inner ears, delivering sound without plugging or covering the ears.

Non-slip grips for mobile devices. Students can simply add these grips to the back of any mobile device to add a layer of GRIPTION.

Protect your students from the digital world. ESET provides security by adding firewalls and content filtering.

Simply add this accessory to any whiteboard. Using it is simple, just use the whiteboard as normal. Upgrade any whiteboard and capture content automatically. Securely share content with anyone.

Cut the cord and give your students TV for free with full 1080 HD with the #1 rated indoor antenna.

Take your students' yoga practice to the next level. These mats are slip-resistant and can be taken anywhere.

This award-winning ecosystem is designed to make experimenting, coding, and building electronics affordable fun.

Ranging from keyboards to headsets, ROCCAT has your students covered for all their gaming needs.

Built to keep beverages hot or cold all day, Takeya is designed for the healthy-minded student. These insulated stainless steel bottles will keep drinks ice cold for up to 24 hours or hot for up to 12 hours.

Rugged, lightweight cases for mobile devices, tablets and laptops. These cases are drop-tested to US Military Specs, ensuring protection in even the most extreme conditions.
