55431	IT-16 Cabinet with power strips
55430	IT-16 Cabinet-no power strips

Use the InTouch16 Cabinet to store and charge up to 16 computer devices (tablets, Chromebooks and laptops). Padded shelves and flexible dividers protect the computer devices. Overhead wire management in a pullout drawer aids wiring integration, and allows the charging plugs to hang in front of each computing device. The InTouch16 Cabinet's small footprint covers less counter space and can be stacked for additional computer device storage with no additional loss of counter space. The InTouch16 Cabinet is made with powder-coated steel for security and a durable and long-lasting finish. A dual-bolt lock on the door increases security of the computing device.
