Adobe Information Center

Adobe authorized reseller access to tools, resources, and information to help expand and enable your business.

Make it. Creative Cloud.

Adobe is changing the world through digital experiences. They help their customers create, deliver, and optimize content and applications.

Who is it for?

Primary User

- All faculty and staff – creativity isn't just for creative majors
- K12, HED
- Design students

Target Buyer

- IT directors
- Instructional designers
- Curriculum coordinators

What users like

- Allows users to “share their story” across print, web, video, and mobile devices
- Adobe provides great resources, curriculum, and on-demand professional development on the Adobe Education Exchange at no charge
- Helps teachers integrate digital literacy into the classroom

What makes it great

- The SRP is very affordable
- Device license: \$25 USD List per license (Min. of 100 licenses)
- Named-user license: \$5 USD List per license (Min. of 500 licenses)
- 17+ desktop applications available

Adobe Creative Cloud

Adobe is offering Creative Cloud for education device and named-user licenses through two options, the Adobe K-12 School Site License and Adobe K-12 District License. Both offerings are available worldwide for primary and secondary (K-12) schools and districts only and purchased through the Value Incentive Plan (VIP).

Reseller opportunities

- Explosion of devices, digital literacy, and student engagement are some of the challenges your customers are facing.
- Adobe Creative Cloud for education helps institutions by providing access to the world's best creative apps for design, web, video, and photography, along with seamless ways to share and collaborate with the support of curriculum, peer community, and resources.
- Lots of room for growth!
 - K12 estimated market penetration: 20%
 - HED estimated market penetration: 5%

ESD

The Leader in Data and Device Protection

Absolute LoJack is the only persistent security solution with an investigations team that can track and return stolen devices, while providing features that protect data on the device.

Who is it for?

Primary User

- Students with high-end laptops or MacBooks that are a common target for theft

Secondary User

- Parents and students looking for extra security, and data and theft protection for their laptop investment

Value for Faculty & Students

- They can get real, physical assistance in recovering a stolen laptop from the Absolute Investigations Team, a professional coalition of seasoned security professionals and former police officers who track down stolen devices and work with local police to recover it
- Prevent data and personal information from falling into the wrong hands with the ability to remotely erase sensitive files, stored passwords, and other personal information from a laptop with Data Delete

What users like

- Peace of mind knowing their laptop is safe in the event of a theft
- A digital tether to a laptop to lock or delete data
- Dedicated Investigations team and 24/5 technical support
- Simple to use and quick to install

Absolute LoJack—Student Edition

Absolute LoJack—Student Edition is available in 1, 2, 3 or 4-year subscription terms.

Visibility. Control. Response.

Bradford Networks is leading the transformation of network security through visibility, control and response. The company continues to provide proven expertise in achieving tangible security improvements to enterprises worldwide.

Trusted by more than 1,000 customers, Bradford Network's Network Sentry addresses a wide variety of use cases providing end-to-end network visibility, dynamic network access control, and automated threat response—the three critical aspects of Security Automation and Orchestration.

Who is it for?

Primary User

- IT departments
- Technology departments

Target Buyer

- K-12, HED
- SMBs

What users like

- Lower total cost of ownership
- Protection of existing investment in multi-vendor wired and wireless environments
- Seamless integration with existing security solutions
- Full visibility and classification of all devices, including IoT
- Alleviate staffing needs with automated threat response

What makes it great

- **Visibility**—Gain complete network visibility, identifying trusted and untrusted devices to reduce the attack surface.
- **Control**—Implement dynamic network access control based on device profile, user and network connections.
- **Response**—Deploy automated threat response to minimize containment time.

BullGuard Internet Security—Protecting You and Your Devices

BullGuard makes it simple for users to protect everything in their digital life—from their data, to their identity, to their Smart Home. As the only security company whose sole focus is on the consumer, BullGuard combines technical expertise with a genuine understanding of user needs to deliver complete protection across all their connected devices. BullGuard is like private bodyguard—tracking and tackling security threats so users can connect confidently, control easily, and travel freely throughout the digital world.

Who is it for?

Primary User

- Individuals or families with multiple devices looking for simple, easy-to-use, and highly effective internet security
- Homes with a network of connected devices
- Parents wanting to keep their children safe when using social media

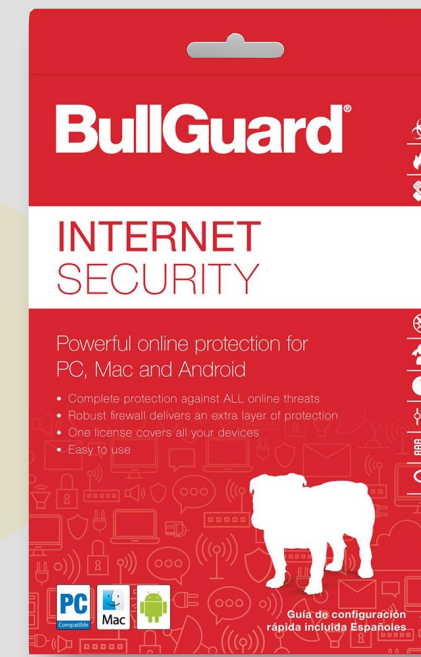

What users like

- Cloud-integrated backup allows backup and encryption of files to Dropbox, Google Drive, and One Drive.

More Time Learning, Less Time Logging In

ClassLink enables single sign-on access to web, Windows, Google applications, instant access to files at school, and in the cloud. Accessible from any computer, tablet, or smartphone, ClassLink is ideal for 1:1 and Bring Your Own Device (BYOD) initiatives.

Who is it for?

Primary User

- Education technology departments
- Professors, Students
- IT departments

Target Buyer

- K-12, HED
- Office of technology/information technology

What users like

- Customizable interface allows the user to personalize their ClassLink portal
- Provides instant access to school files and applications from anywhere and any device, allowing for better productivity
- Gives teachers and staff a central place to locate district approved resources—saving time, and improving on security

How it compares

ClassLink has a library of over 6,000 single sign-on connections which is larger than all the other SSO companies combined! The intuitive design means the user experience is flawless. Users log in once and get access to all the programs, applications, and files they need to teach and learn.

What makes it great

- Safe, secure, instant access to all your school's apps and digital learning tools
- Multiple login options including QuickCards for younger students
- ClassLink has a library of over 5,000 SSO apps and will build any custom connections the district needs at no additional cost
- Includes usage analytics to give education leaders insight into what apps are being used and by whom

ClassLink

Volume licensing programs are available for departments and institutions—contact us at licensing@dstewart.com to learn more.

Reseller opportunities

- Highly scalable—currently supporting districts with over 300,000 users
- Deal registration available
- Reseller margins of 10% - 25%

EndNote X9 Coming Summer 2018!

A Smarter Way to Research

Leave behind the tedious work of bibliographies and reference management and take your research to the next level. EndNote is a research bibliographic tool designed to support research in virtually any kind of research organization, from academia and corporations to government agencies and research institutions.

EndNote enables users to promote new and ongoing research, enhance organizational research publishing needs, provide a standardized reference management tool with access anywhere, and track research trends, authors or topics easily.

Who is it for?

Primary User

- Institutions where there are a large number of graduate students, publishing faculty, and researchers

Target Buyer

- Graduate students
- Graduate program department heads
- Researchers

Reseller opportunities

- There are roughly 12 million graduate students in North America—EndNote is a mission-critical product for every one of them.
- Custom licensing options available for departments, institutions, and more—contact licensing@dstewart.com to learn more.

Who is it for?

Primary User

- Graduate students
- Motivated undergraduate students who will go on to graduate programs, medical/nursing schools, and research-oriented professional positions

What students and faculty like

- Work from a single reference library with up to 100 people, no matter where they are located or what organization they are affiliated with
- For one upfront price, store and share as many references, documents and files as you need—a necessity for successful collaboration
- Instantly see the history of changes made to shared library with a built-in activity log

Reseller opportunities

- A new crop of graduate students come along every year, so sales are renewable.

For 30 years, ESET® has been developing industry-leading IT security software and services for businesses and consumers worldwide. ESET unobtrusively protects and monitors 24/7, updating defenses in real time to keep users safe and businesses running without interruption.

WHY ESET »

Retail: Who is it for?

- College students who frequently rely on their computers and the internet for day-to-day studies and research, will benefit the most from using ESET Internet Security (PC) or ESET Cyber Security Pro (Mac), which will keep them protected no matter if they're connected to unsecure Wi-Fi or file sharing with their fellow pupils.
- Students always on the run will benefit from ESET Internet Security's anti-theft feature which will allow them to lock and track their computer in the event it is lost or stolen.

Retail: What users like

- Fast, light, proactive, and effective protection
- Anti-theft, webcam protection also included
- Protection of both physical and digital assets

Retail: Reseller opportunities

The FileMaker Advantage

The FileMaker Platform is a unified tool to help users quickly create and use custom apps that work the way they do. They can organize contacts, track inventory, manage events, and much more. The same app works on their mobile device, computer, the web, and in the cloud.

Who is it for?

Primary User

- Teachers
- School administrators
- District administrators

Target Buyer

- K-12, HED
- Technology and IT decision makers

What users like

- **Quick to get started**—Import a spreadsheet, use a built-in template, or create a custom app that works the way they do.
- **Easy integration**—Connect to existing data and systems the school or district is already using.
- **Comprehensive learning tools**—Take advantage of guides, videos, an online community, and in-person events to help create custom apps or troubleshoot issues.

How it compares

Unlike other platforms, custom apps created using the FileMaker Platform work across mobile, cloud, and on-premise environments to help schools and districts eliminate inefficient processes and scattered information.

What makes it great

- **Anywhere access**—Use one unified platform to create apps that work together on mobile devices, computers, and the web. Deploy on-premise or in the cloud.
- **Flexible**—Users can create exactly the app they want using an intuitive graphical interface and flexible design tools.
- **Built-in reporting tools**—Create reports and charts on the fly. Easily build custom reports with a step-by-step assistant.

CREATE CUSTOM APPS »

Safer Students. Better Learning.

From cloud-based filtering and self-harm alerts to teacher/student chat and screen viewing, GoGuardian has everything they need for a successful tech program.

Who is it for?

Target End User

- K-12 IT departments
- K-12 teachers

Target Buyer

- K-12 IT administrators
- K-12 curriculum directors

What users like

- User friendly and easy to setup/deploy
- Makes teachers more efficient and effective in the classroom
- Reduces workload for IT administrators

How it compares

Smart Filtering on GoGuardian Admin reads the content on the page and analyzes it in real time to determine if it is inappropriate content, rather than blocking or allowing based on URL.

The scenes feature on GoGuardian Teacher allows teachers to create their own custom learning environments—creating the perfect digital learning environment that protects, guides, and encourages students.

What makes it great

- Smart filtering reads the content on the page to determine in real-time if it's inappropriate or not, rather than filtering based on URLs
- Allows districts to be more proactive about student safety concerns

GoGuardian on Windows

Classic GoGuardian Admin and GoGuardian Teacher products are now available on Windows devices, as well as Chromebooks. Now available through volume licensing.

Reseller opportunities

- Typical reseller margin of 12.5%
- Deal registration available, (up to an additional 12.5% over standard reseller margin)
- Resellers are provided access to the GoGuardian regional sales teams to provide demos or help customers get set up with a free trial

A Help Desk Support Platform Built for Schools

More than a help desk, Incident IQ is a technology support platform that enables school districts to manage all the hardware, software, and systems that teaching and learning depend on.

Incident IQ is built from the ground up for today's K-12 with simple ticket submission for teachers and students, efficient workflows for support teams, and powerful analytics for leaders.

Who is it for?

Primary User

- IT directors
- IT technicians
- Teachers and students

Target Buyer

- K12, HED
- IT department heads
- CIO/CTO

What users like

- Simple, modern interface.
- Intuitive—very little onboarding required
- Built entirely for the K-12 use case—addresses pain points only found in the K-12 environment

How it compares

Incident IQ is a technology support platform built entirely for the K-12 market. It caters to users of all levels of technical ability, and features a wide range of apps and integrations that allow districts to tailor Incident IQ to fit their unique district needs.

What makes it great

- Simple for teachers to submit help tickets
- Powerful for IT teams to resolve help tickets
- Analytics for district leaders to evaluate the performance of their technology and team

Everything Needed to Write a Great Novel or Screenplay!

Seeing a gap in the creative writing market, Mariner purposely took the bold step to develop creative writing products and at the same time, sought to acquire or republish existing ones. By developing such products, Mariner's aim was to challenge industry leaders. In acquiring or republishing existing apps, the goal was to provide new technology and an intuitive user interface, as well as the Mariner brand. Since 2004, Mariner has acquired or republished 9 different writing applications for both the Mac and Windows operating systems.

Who is it for?

Primary User

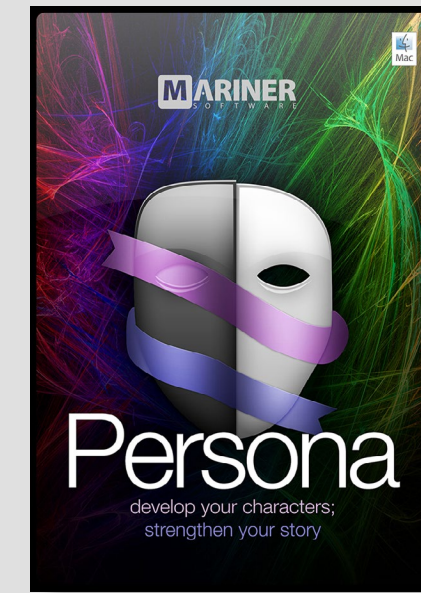

- Future screenwriters and novelists should use Persona to assist with character development

Value for Faculty & Staff

- Simple, easy to use interface
- Creating a compelling, empathic, and believable character in a story doesn't have to be something left to chance—with Persona, the choice is up to you

RETAIL

What users like

- Ability to create Smart Groups based on attributes like tags, type, sex, or any word or phrase from any notes
- The archetypes in Persona consist of 16 male and 16 female personalities, each group broken down into heroes, heroines, villains, and villainesses.
- These archetypes are described in detail: personality traits, qualities, flaws, background, occupations, and how they interact with other personalities. Whether the character is a brainiac talking fish or an outcast orphanage owner, Persona helps users explore how each one's unique psychology and background influence their dealings and dialogue.

What makes it great

- Get inside all the character's head
- Develop the characters; strengthen the story
- Designed to keep users focused on the task of creating their characters

Create, Edit, and Collaborate with Microsoft Office!

Microsoft Office Electronic Software Delivery (ESD). Users can buy and receive their copy within the same day!

Who is it for?

Primary User

- Any student who wants to accomplish more for home and homework: make ideas shine, take great notes, easily share files

Secondary User

- Anyone who has a home device that wants to show their best work through Word, Excel, PowerPoint, and OneNote

Value for Faculty & Students

- Users will be able to use Word, Excel, or PowerPoint to turn their ideas into creative and convincing presentations
- They will be able to store their files online, at home, or on the go and invite others to review or edit

What users like

- Accomplish more for home and homework
- Easily organize their notes and find just what they need fast in OneNote
- Store their files online, on the go and they can quickly invite others to review or edit them

How it compares

First, Office features the world's best and most popular productivity applications. Users are not limited to lesser functions and they don't have to worry about formatting getting lost or changed when they move between the cloud and their devices. Second, only Office gives them a consistent experience across all of their devices.

What makes it great

- Full access to Word, Excel, PowerPoint and OneNote
- Store files in the cloud with OneDrive and easily share
- Made for PC or Mac

Essential for Classroom Management

Netop software connects more than 6 million teachers and students, helping schools transform education and improve learning outcomes with tools that make teaching with technology easier and more effective.

Who is it for?

Primary User

- Teacher or lab instructor in grades 6-12
- IT director, CTE director
- Instructional coach

Target Buyer

- K-12—primarily middle school and high school
- IT, CTE department heads

What users like

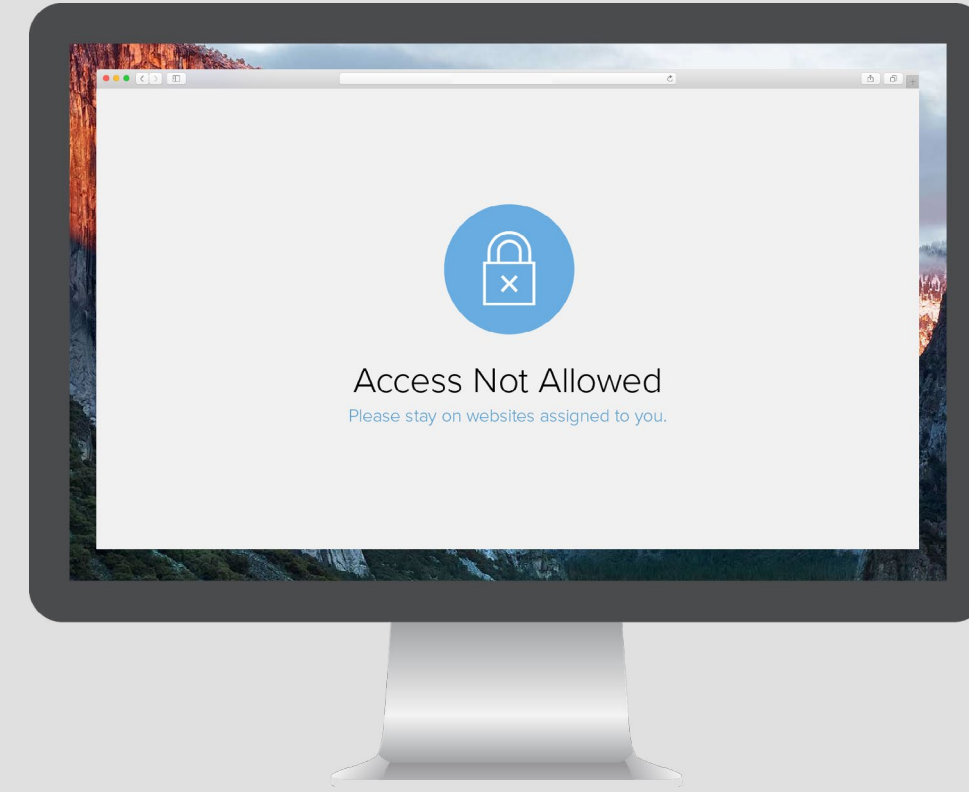

- Ease of use
- Ability to see real-time views of student screens
- Reduces off-task behavior
- Reclaim lost instructional time

How it compares

Vision Pro for Windows is the market leader in classroom management for Windows devices.

Vision for Chromebooks provides visibility to ALL current student activity on Chromebooks, unlike many other solutions which are limited to showing only the active browser. This is especially important if the customer is using Android apps.

What makes it great

- Designed for teachers
- Keeps students on-task
- Proven to improve student performance

The simplest and most secure way to provide Windows® applications to employees and students with Mac® computers.

Parallels is a global leader in cross-platform solutions for MacOS®, making it simple for customers to run Windows and Linux on Mac. Enabling businesses and individuals securely and productively use their favorite Windows and Linux applications, devices and preferred technology on Mac computers without rebooting.

Who is it for?

Target User

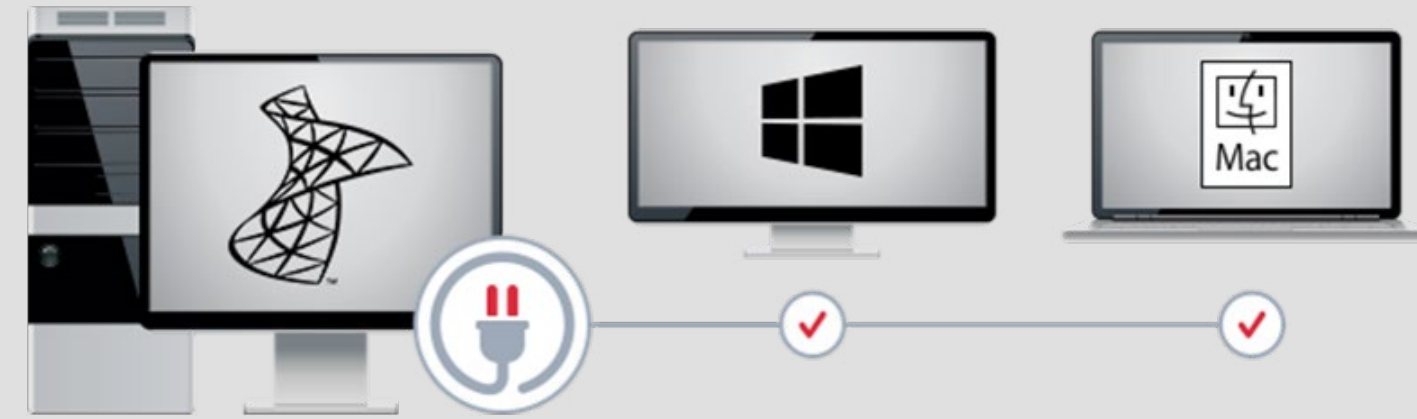

- Students or faculty who are required or need to use Windows or Linux for school, work & labs, software development and testing, gaming etc... but who wish to do so using their Mac

What students and faculty like

- They are able to use Mac and guest OS applications side-by-side (no restarting required) and easily drag & drop and copy/paste between them
- Gives engineering students and developers the ability to easily develop and test apps across multiple operating systems, and connect external devices not supported by Mac
- Empowers student users to effortlessly run graphic and resource hungry Windows applications without slowing down their MacBook®, iMac®, Mac mini®, or Mac Pro®

Reseller opportunities

- ESD options available
- #1 choice of Mac users to run Windows on Mac—with over 5 million customers using Parallels daily

Who is it for?

Target User

- K12, HED
- IT departments
- Helpdesk IT support

Target Buyer

- SCCM Administrators
- IT management

Reseller opportunities

- By leveraging and extending native Microsoft SCCM capabilities, Parallels Mac Management for Microsoft SCCM is an easy and cost effective way to manage Mac computers in traditional Windows-centric environments.
- Parallels® Mac Management enables IT teams to monitor and manage Mac, allowing their IT personnel to construct and deploy applications, packages and images via SCCM (a tool they're already proficient with) to Mac computers anywhere in the user community.

Show. Solve. Secure.

PTC Mathcad Prime 4.0 for students helps users studying engineering solve, analyze, and share calculations.

Who is it for?

Primary User

- Engineering students and faculty

Value for Faculty & Students

- The software calculates results and communicates ideas at the same time, allowing them to present their work with plots, graphs, text, and images in a single professionally-formatted document. It couldn't be easier. When their IP is shareable, easily readable by anyone, and lives in one place, they've moved from managing information to making it a source of competitive advantage

What users like

- Content protection: they can share calculations without exposing their IP
- Interoperability with 3rd-party applications: MS Word and others
- Improved performance: manage large worksheets more effectively

What makes it great

- Securely communicate design intent and engineering knowledge
- Intuitively construct calculations using standard math notation
- Create professional-quality documents with live math, plots, text, and images
- Repurpose standardized calculations

Language Learning with a Purpose

The mission of Transparent Language is to create a language-learning platform that transforms the way organizations conduct their language learning programs. Today, Transparent Language enables government organizations, educational institutions, libraries, and companies around the world to train faster and with more reliable results.

Who is it for?

Primary User

- Students and faculty looking to travel and work in foreign countries
- Foreign language departments
- Hobbyists looking to learn new languages

Value for Faculty & Students

- **Speaking Practice**—The proprietary EveryVoice™ technology allows users to speech-enable classic learning activities like multiple choice and pronunciation practice, allowing them to compare their pronunciation to that of a native speaker
- **Practice Activities**—Users can practice listening, reading, speaking, and writing skills with learning material from any lesson using over a dozen challenging activities

RETAIL

What users like

- **The “Welcome” Lesson**—Using game dynamics, the Welcome Lesson walks users through a quick, basic lesson to learn a few key words and how to use the program.
- **Enhanced Compatibility**—Optimized for touchscreen use on Android™ tablets and iPads, Transparent Language Online works on virtually any Internet-connected device or computer.

What makes it great

- **Alphabet Lessons**—They can’t learn to read or write if they don’t know the alphabet. Students get started on the right foot with the Alphabet course.
- **Core Skill-Building Activities**—Listening, speaking, reading, and writing are the four pieces of the language puzzle. Put them all together through dozens of learning activities, including pronunciation practice and typing tasks.
- **Mobile Learning**—Optimized for touchscreen use on Android™ tablets and iPads, students can learn on virtually any Internet-connected device or computer.
