

ideamapper

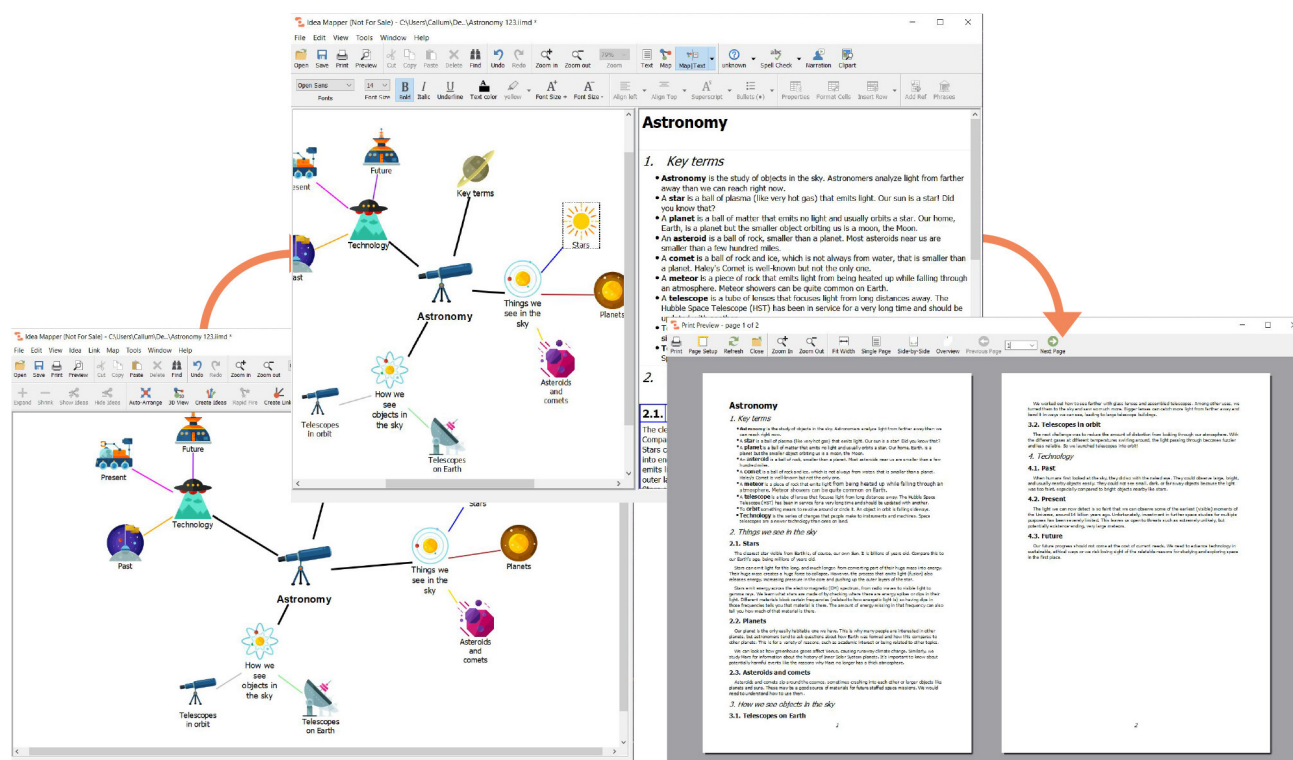

- ✓ Next generation mind mapping tool
- ✓ Never lose your old maps with unique Inspiration importer
- ✓ Use one program with built in word processor
- ✓ Compatible with Chrome OS, Windows & macOS

Combining innovative idea maps with word processing capabilities, ideamapper is a unique and versatile software that captures creativity, increases productivity and broadens understanding.

Created for grades 5-12, ideamapper enables students to brainstorm and input creative thoughts via visual mind maps, using these as prompts to create well-structured work.

Using images and icons in maps aids creativity and helps the user to absorb and retain more information.

Benefits of ideamapper include:

- ✓ Improved structure: Whatever you write is **structured automatically**, with ideas and written content instantly visible in **split-screen** mode.
- ✓ Time-saving: Brainstorm, structure, write, edit & publish from **one single application**, and use the 'rapid fire' tool to help get thoughts down before they disappear.
- ✓ ideamapper helps the student to focus on specific areas of their work without getting overwhelmed by the detail.
- ✓ Manage information in different forms: **Unique 3D view** increases interactivity, providing a more tactile sense of the abstract. It also helps visualize the structure of larger maps with ease.
- ✓ Compatible: Easily import and edit **Inspiration*** documents.
- ✓ 100's of templates for **core curriculum**. 1000's of modern clip art images included.
