

The most responsive, intuitive mind-mapping software. For students of all learning styles!

ideamapper (Grades 5-12)

- Brainstorm & link ideas, restructure, edit and publish work within one program.
- The unique split-screen view enables students to view their map and create a document the same time.
- Large maps are easy to view on one screen using the 3D view functionality.
- ideamapper captures a user's creativity, helps to increase productivity and broadens

ideamapper 4 Students (College/University)

- ideamapper 4 Students has all the features of regular ideamapper but includes a referencing functionality.
- Students can add citations with ease. When quoting external sources, reference placeholders are added, which helps to reduce accidental plagiarism.
- The templates and academic phrase bank helps students to start their assignments with ease.

ideamapper 4 Kids (Kindergarten – Grade 4)

- Helps to develop primary student's analytical and writing skills.
- Students can add a visual element to their writing by using the extensive clipart gallery.
- Complex ideas can be visualized from different perspectives using the 3D view tool, promoting analytical thinking.
- ideamapper 4 Kids strengthens student's skills, helping them to turn great ideas into a piece of writing.

ideamapper 4 Students AT (College/University)

- ideamapper 4 Students AT contains all the features of ideamapper 4 Students but has additional assistive technology features.
- Features include text-to-speech and paragraph structure highlighting.
- ideamapper 4 Students AT helps students to create work that is an accurate reflection of their ability, unclouded by their disability.

- ✓ Patented split screen view
- ✓ Import maps from other mind mapping programs e.g. inspiration
- ✓ Four editions tailored to different ages and abilities
- ✓ Available on Windows & Mac
