

Why Upgrade

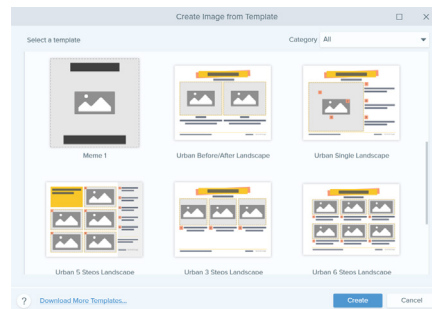

What's New in TechSmith Snagit 2020?

Snagit 2020 introduces two new creation tools and enterprise outputs to Slack and Box

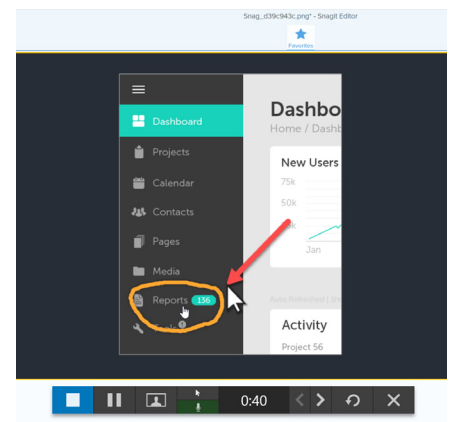

- Combine images in new, pre-made layouts right within Snagit to create visual documentation, tutorials, and training materials in no-time.
- Talk and draw over a series of screenshots to create a quick “how-to” video or GIF
- Share directly to Slack and Box. With over 15 sharing outputs Snagit makes it even easier to share content at work.

Use the Create button to create an Image from Template or record Video from Images

Choose from professionally designed template layouts to display content and technical information

Record narration and drawings over screenshots and images

Snagit 2020 offers new and faster ways to create and share technical information
