

GRAB N GO & B2B TOWER SOLUTIONS

With many businesses moving to Chrome and Cloud based solutions, no longer do employees need to have their own laptop, tablet or device that they log into and take home at night. Now they can use any device, from anywhere.

A Tower stacked with Chromebooks in the workplace. An employee can grab a device and get to work in minutes. When they are finished for the day, they simply return the device to a Tower and its ready for the next user. No reconfiguration necessary. Saving millions of pounds annually for the company and keeping employees satisfied and feeling productive. No more frustrating down time waiting for repairs and logging service desk calls!

WHY POWERGISTICS?
