From Cardboard Boxes to Hands-On STEAM Learning

Makedo is a cardboard construction kit that teaches kids to harness their creativity to build their own toys with one of the most recycled materials on the planet. The process is so much fun that teachers will find themselves wanting in on the action by working alongside their students, to transform cardboard boxes into dragons, unicorns, castles, UFOs, and more.

Makedo is a catalyst for critical thinking because it fosters the natural inclination of the child to learn by doing.

Cardboard Today, The World Tomorrow

THE KEY TO TRUST

Yubico is the creator of the YubiKey, the industry's #1 security key, enabling strong two-factor, multi-factor and passwordless authentication into your favorite applications and services.

YubiKey - Easy-to-use, strong authentication, proven to eliminate account takeovers

- With a simple touch, the YubiKey provides phishing-resistant protection to computers, networks, and online services.
- A single YubiKey works with hundreds of popular business, education, and personal applications and services.
- No more reaching for your smartphone, or re-typing passcodes.
- Just plug in your YubiKey, tap, and it does the rest for you.
- No batteries or network connection required, water and crush-resistant

YubiKey is easy to deploy and manage

Step One: Distribute YubiKeys to your users.

Step Two: Set up or self-enroll YubiKeys to your favorite applications and services.*

Step Three: When logging in to a registered application or service, you will be prompted to touch your YubiKey to verify it is you, and only you logging into your account.

Step Four: Have peace of mind.

*it is recommend to register at least two YubiKey with accounts as a primary and secondary

yubico

PROTECT THE DIGITAL YOU

YubiKey 5 Series features include:

- Strong, hardware-based authentication that works across all operating systems and mobile phones, protecting your accounts across your devices.
- Multiple form factors to best suit your computing environments
- USB-A, USB-C, Lightning connections, and wireless authentication via NFC for mobile
- Multi-protocol support to work across legacy and modern applications and services
- Support for modern FIDO-based standards and passwordless authentication.

Back in Person or Back Online?

What colleges are deciding
for this semester

With the recent surge of the Omicron variant of Covid-19, many colleges are trying to figure out whether students should return on campus or start the semester online.

Colleges across the country are weighing their options between a delayed semester start, pivoting to online classes, or resuming on campus learning with Covid mitigation strategies.

Booster Mandates

According to Forbes, many colleges are now requiring booster shots along with initial vaccination mandates for on-campus students.

Waiting out the Surge

Other universities are deciding to either delay the semester, such as Yale, or start off the first few weeks online, in the hopes of avoiding a surge of Omicron cases. Harvard announced that it would conduct most of its classes and work remotely for the first three weeks of January, along with Stanford University, Columbia University, Duke University, University of Illinois Urbana-Champaign, Northwestern University and more.

Forging Ahead (Carefully?)

Rylie Martin, assistant director of C2i, says, "There are a good number of institutions bringing students back on schedule. Many are maintaining COVID mitigation strategies from the fall semester, which means having indoor masking mandates, requiring either re-entry testing once students get back to campus or testing prior to coming back."

With uncertainty surrounding the Omicron variant, many school administrators will be taking a cautious approach to the semester. The task of managing Covid-19 remains a challenge for higher education for the foreseeable future.
