FLEX20

Charging and Storage for Chromebooks, Laptops and Tablets

Locking Side Door
Access power bricks while unit is mounted to the wall. Locking door protects and secures power bricks and strip. IT staff won't waste time rewiring again.

Maintenance-Free Cable Management
Designed for student use, the perfected cable management provides quick device return and retrieval.

100% Student Managed
Numbers and colorful shelves direct students to their exact devices without help from classroom teachers.

Standard Power
Accommodates the power needs of any device, even the most robust laptops, with a fast charge of 2-3 hours.

Visual Security
The open door design allows teachers to clearly see if all the devices are charging and stored from anywhere in the classroom.

Innovative Vertical Design
Vertical design allows devices to lay flat in their natural position, protecting them from damage during device return and retrieval.

Antimicrobial Powder Coating
This gives an extra layer of protection against spreading common germs.

FLEX20 comes with wall mounting plate and hardware. The Tower can be mounted to the floor.

With a human-centered and low profile design, the Flex makes devices easily accessible by students of all ages and levels. For reference, the teacher is 5'3".

Inspired by an IT Director and Designed for You.

An IT director of a school in south central Wisconsin needed a device charging unit that took up minimal space and could organize the charging cables. When he found nothing on the market, he approached the owner of G.D. Roberts. Nathan Roberts brought his expertise in human centered industrial design to the collaboration, fulfilling the need for an innovative and modern charging solution for the classroom. From there, the PowerGistics Tower was born and has since gained worldwide recognition.
