NEW VideoStudio®
Pro & Ultimate 2023

Fun and easy video editing for students

Let your students dive into fun and easy video editing with Corel VideoStudio! Students will get to explore drag-and-drop creativity with hundreds of effects, filters, titles, and transitions, create GIFs and animated stickers, add animation and much more for dynamic results. Save time with Instant Project Templates and Speech to Text Converter.

Available in ESD and Volume Licensing.

Always current, always relevant.

This latest agnostic version means your students will have access to current video editing tools up to a year after your purchase.

Capture
Import your own clips, record your screen, or capture multi-camera videos with built-in tools.

Edit
Make quick corrections with basic tools, play with color, add creative filters, titles, and transitions.

Done
Export your projects to popular formats and devices, share online, or burn to disc with a custom menu.

5 WAYS
TO HELP STUDENTS MANAGE STRESS

While academic learning is important, developing students' resilience and coping skills to lead healthy and successful lives is just as critical. Use these 5 tips to help your students alleviate their worries.

1 Encourage healthy habits
Encourage students to prioritize their physical health by getting enough sleep, eating nutritious foods, and engaging in regular exercise. This can help reduce stress levels and improve overall well-being.

2 Provide emotional support
Be a listening ear for students and provide them with a safe space to talk about their emotions. Let them know that it's okay to feel stressed and that they're not alone in their struggles.

3 Teach stress management techniques
Teach students different techniques to manage their stress, such as deep breathing, mindfulness, and visualization. These techniques can help them relax and refocus during times of stress.

4 Foster a positive classroom environment
Create a positive and supportive classroom environment that encourages students to feel comfortable expressing themselves and taking risks. This can help reduce stress levels and improve overall academic performance.
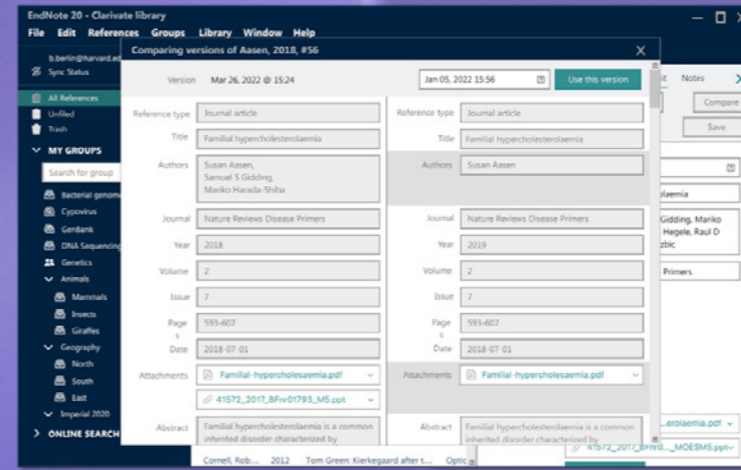

5 Address the root causes of stress
Work with students to identify the root causes of their stress, whether it's academic pressure, family issues, or social anxiety. Once the root causes are identified, work together to develop strategies to address these underlying issues.

Clarivate™ | EndNote™

Accelerate Your Research—Focus on Your Ideas

The best reference management tool is getting even better. The all-new EndNote® 21 helps students manage and format citations like never before with bold new features.

- Search hundreds of online resources for references and PDFs.

- Access full text research articles with one click.

- Easily read, review, annotate, and search PDFs in your library.

- Insert in-text citations from your library with the Cite While You Write feature in Microsoft® Word.

- Share some or all your library with collaborators worldwide.

- Conduct large-scale literature reviews with ease and speed using powerful analysis tools.

- Match your paper with relevant, reputable journals using Manuscript Matcher.

- Provide write or read-only access to your library.

  Available in ESD and Volume Licensing.
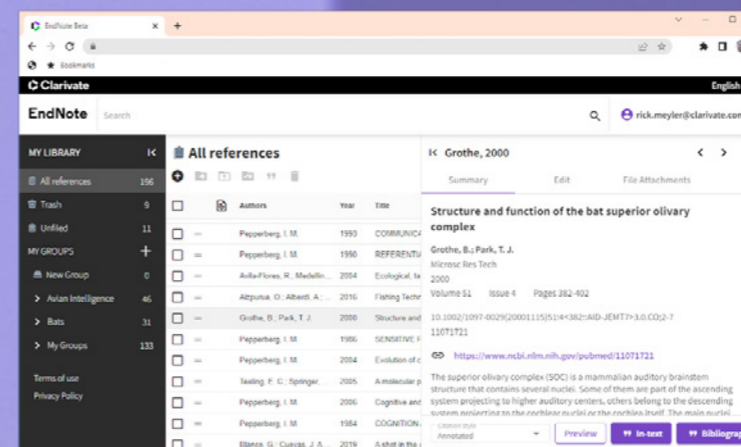

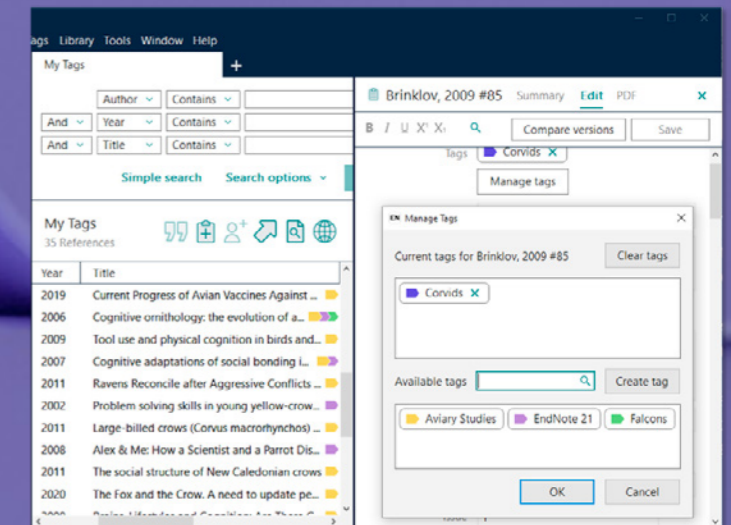

Protect your work with data restoration function.

EndNote® 21 can recover your library from the cloud and get you back where you belong.

Stay organized with tags.

Tags are customizable labels that let you organize your references however you'd like.

Experience a new exclusive EndNote Web interface.

Access your research anytime, anywhere from the cloud. Move seamlessly between online and the desktop and iPad® applications.

INVENTION KIT FOR THE 21ST CENTURY

Cultivate creativity, imagination, curiosity, and innovation with Invention Kits by Makey Makey. Everyday objects are transformed into touchpads, empowering students to interact with computers as creative tools. The computer becomes an extension of their creativity, fostering imaginative play and discovery.

CRAFT AND CODE

Students can design their own controllers with everyday materials like playdough or graphite pencils. Children get to control games while learning code without any previous knowledge.

SUPERMARKET CIRCUITS

The world is full of conductive objects and materials. Make musical circuits with liquids, fruits, and low-cost office supplies.

BUILD YOUR OWN SENSORS

Using foil, pennies, and paper clips to invent sensors just like scientists do.
