Press the Play button to start the robot

5

Coding with interactive tech

I can draw

I got wings

I got arms

With building blocks

## Tale-Bot Pro

Creating your own interactive stories through coding: Tale-Bot Pro is an entry-level learning robot set for kids aged 3 and up. Leveled up with the innovative technology and with a wide range of cross-curricular Interactive maps, kids can learn basic coding concepts, and manipulate a robot to develop stories in a smart manner. Through the game-based play, kids can improve skills of free speaking, and storytelling, while their creativity, logical thinking and computational thinking skills are exercised.

# Features
