Coding Set

Allowing kids to develop the necessary cognitive abilities and learn coding skills at a young age. Kids are expected to leverage their imagination to create infinite possibilities using coding blocks and algorithms to control a robot car. With instant feedback, they will quickly learn that coding is simple.

How to play

1 Plan the Route

2 Go and Observe

3 Verify and Debug

4 Advance to the next level

Features

No screen required

Kids can construct their knowledge on coding and logic directly with their hands.

Intuitive symbol design

Use directional language and no literacy required.

Gamification

Kids learn through playing and feel that coding is simple.

Easy to expand

Available to be played with Musician/ Artist/Animation/ Sensor add-on.

What's Included

MatataBot x1

Command Tower x1

Control Board x1

Double-sided Map x1

Challenge Booklets x3

Move Forward x4

Move Backward x4

Loops x4

Function x4

Preset (Fun) x3

Numbers x10

Right Turn 90°x4

Left Turn 90°x4

Flags x3

Obstacles x8
