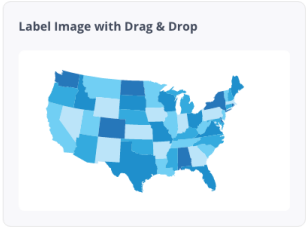
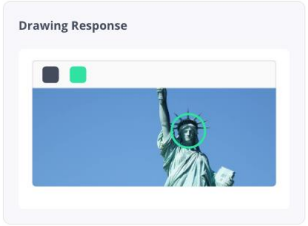
PRODUCT OVERVIEW

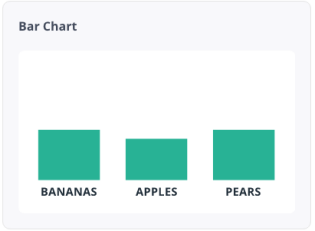
Product Overview | Customizable Tech-Enhanced Items

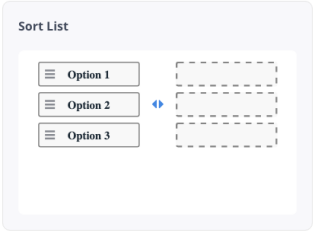
Edulastic contains **51+ tech-enhanced question types** that mimic end of year test questions. See them in action.

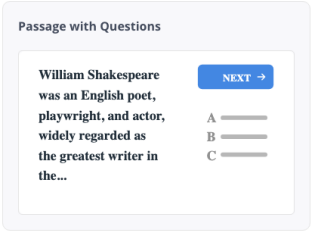
- Multiple Choice
- Fill In the Blanks
- Classify, match, and order
- Writing
- Passage
- Highlight
- Math
- Graphing
- Charts
- Multipart







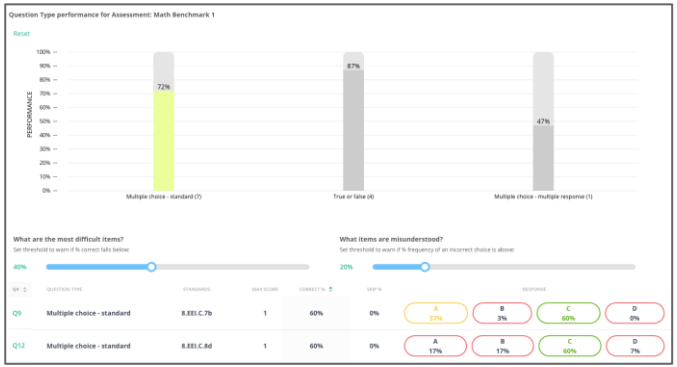




Product Overview | Instant, Robust Data

Auto-graded questions give teachers and administrators real time insight into student understanding and growth

- ▷ Monitor live tests in progress
- ▷ Compare performance by sub-groups
- ▷ Identify common mistakes
- ▷ Measure growth over time
- ▷ Track standards mastery
- ▷ View student profile report



Product Overview | Assessment Results + Analysis

The Single Assessment Report provides a quick overview of a single assessment for teachers and leaders.

Easy drill downs show performance by standard, question, student sub-groups and individual students.

Group students by customized performance bands and analyze common mistakes and distractors.

Administrators see all data for their building or the whole district.

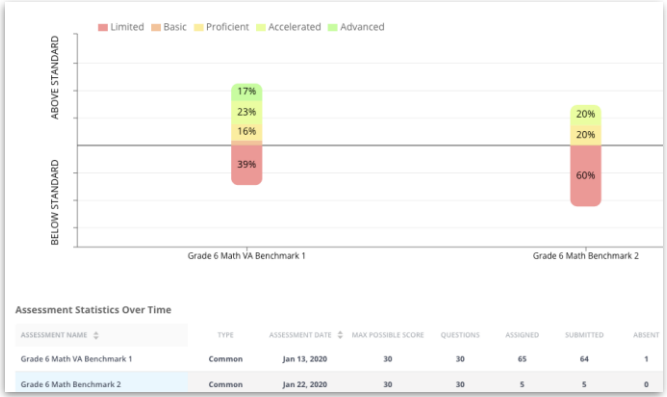
Single assessment overview of scores and performance bands

See performance by standard, question, teacher, student subgroup and more

Product Overview | Measure Growth + Progress

The Multiple Assessment Reports show progress over time by score and standard.

Review and compare buildings, teachers or classes as a whole or drill down to individual student level to see growth trends.

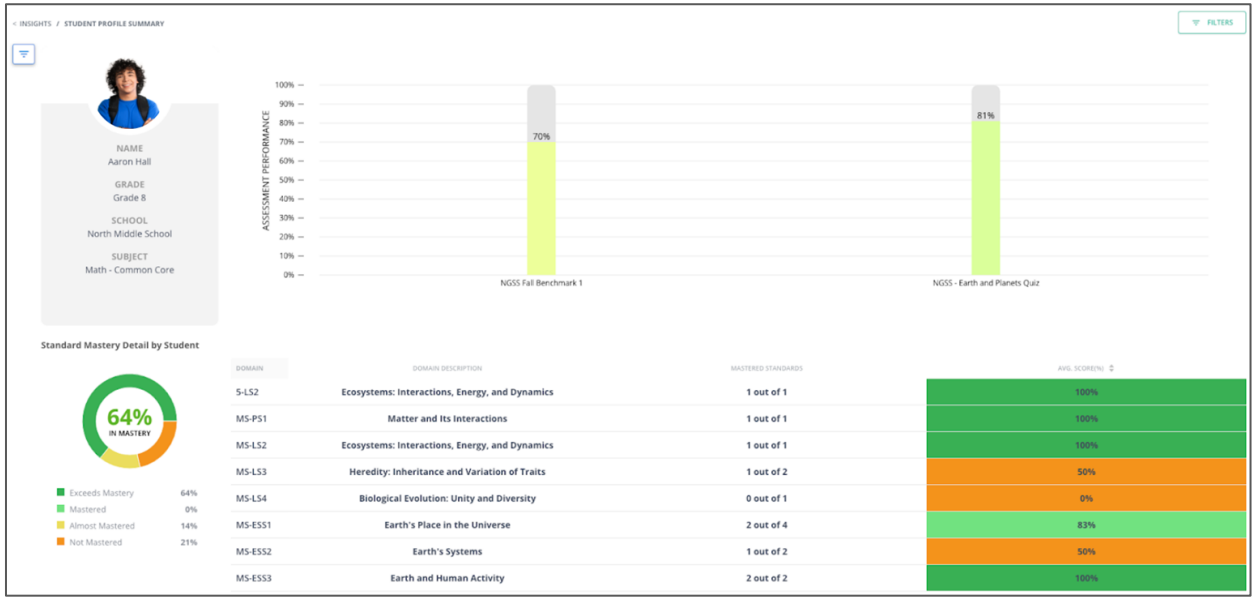


Class Performance by proficiency band assessment to assessment

Progress trends for each student by score and proficiency band

Product Overview | Student Profiles

Student Profile Reports show detailed assessment performance and standards mastery for individual students. These are ideal for sharing with parents, as the detailed report describes every standard.



Student Profile summary showing assessment scores and standards mastery status

Product Overview | Track Standards Mastery

Mastery Reports show cumulative mastery toward standards or learning targets, at the individual student, class and building levels. You can customize the mastery criteria to fit your educational model, using a simple mastery threshold or a decaying average for example.

Mastery Summary shows which students are progressing well toward which standards, and which may need intervention.

Product Overview | High Quality Item Banks

Use or customize pre-built assessments from Edulastic or a publisher. Create assessments with questions from our item banks, author your own questions, or mix and match. We can also import tests you already have in most common formats (QTI, Word, PDF, Google Docs, etc.)

EDULASTIC CERTIFIED

Developed by Edulastic assessment team with years of assessment development experience, plus items from popular sources like Engage NY, Achieve the Core, and released items from many state tests.

INSPECT®

Written by Key Data Systems and includes 300 pre-built assessments and item banks for ELA, Math and Science.

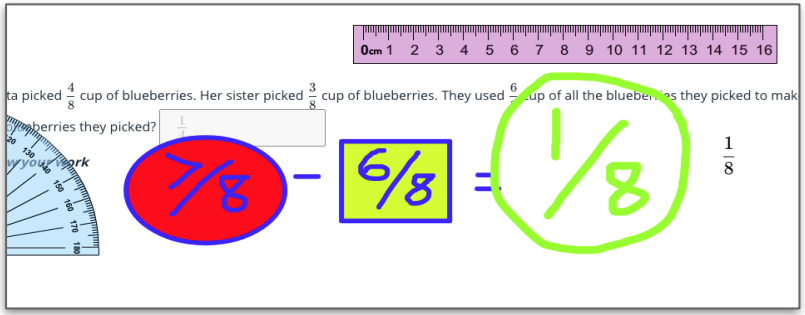
QUEST™

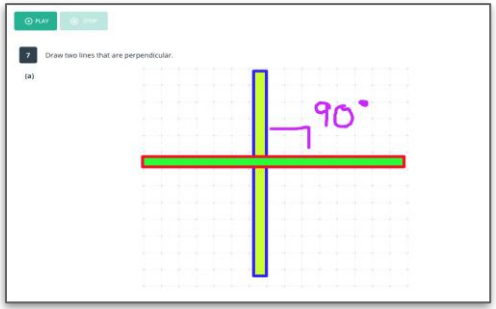
Custom benchmarks to assess your high priority standards and mimic the format and rigor of your state's summative tests.

BOY, MOY, EOY assessments designed for one class period follow your district's pacing guides for accurate data on standards proficiency.

Product Overview | Distance Learning Support

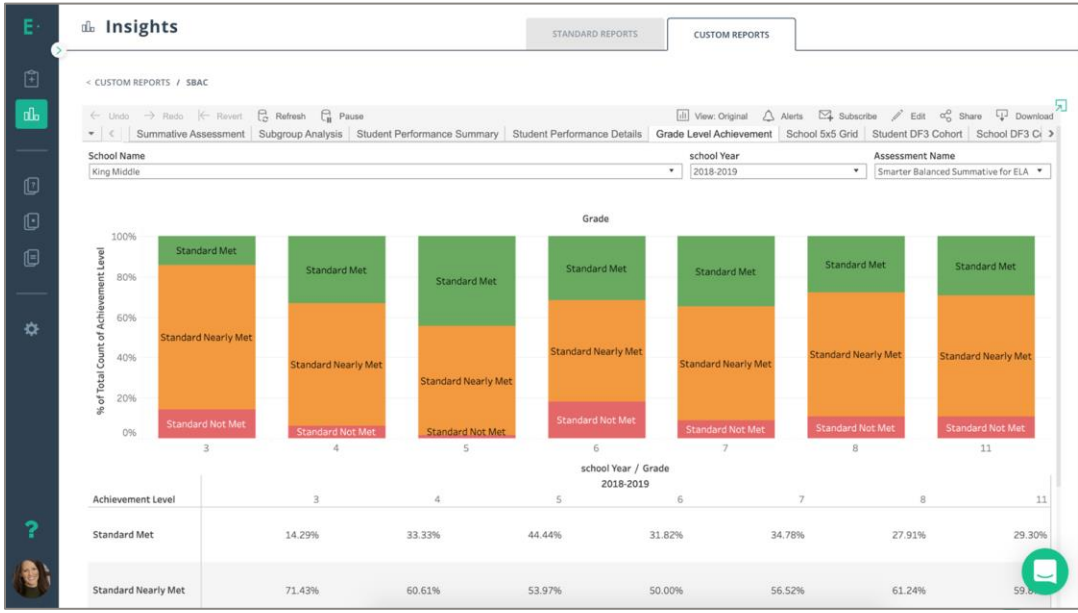
- Browser-based and works on any device
- Browser locks: Safe Exam Browser and Chromebook Kiosk Mode
- Timed tests
- Read aloud for younger students
- Students can show work using Scratchpad





Product Overview | Data Warehouse

- Bring your data together for a holistic picture of student achievement and growth
- Import data from multiple sources such as:
  - State Tests
  - Other assessment systems like IREADY and MAP
  - SAT/ACT scores
  - DIEBELS and Running Records



Additional Content

Additional Content | Spark

Edulastic offers curriculum aligned assessments and practice in math, english language arts, and science. These can be added-on to Edulastic Teacher Premium or Edulastic Enterprise accounts.

SparkMath

SparkMath features more than 1,250 pre-built assignments that mirror state tests. It provides teachers with curriculum-aligned differentiated math practice, arranged in modules, to give to students.

Upon completion of an assessment, SparkMath automatically recommends review, practice or challenge work for each individual student.

SparkReading

From phonics practice to literary analysis, SparkReading engages students to master standards and become fluent readers.

Choose from four different SparkReading sections: Phonics, Literature, Reading Comprehension, and STEM Cross-curricular.

SparkScience

SparkScience includes pre-built NGSS-aligned assessments and activities organized by topic for formatives, quick checks or additional practice.

There are elementary, middle and high school packages available. Educators can mix these questions with their own, or with other questions from the Edulastic item bank.
