Redefining Video for Education
Turn Class Time into Content Creation Time with Swivl

Swivl is a 3-part, complete, flexible solution already in use in over 6,000 schools to help teachers present and record content in the classroom. Available at a fraction of the cost of similar platforms, Swivl is the ideal solution for education.

Swivl Robot

The Swivl Robot works with any tablet, smartphone, or DSLR camera and follows the movement of the marker. The marker has a built in microphone and buttons that start, stop, and pause recording and tracking.

Swivl Capture App

The FREE iOS and Android™ app controls the firmware and settings for the Swivl Robot. The app allows users to easily record lessons, student presentations, or performances. With the heads-up display users can view presentations, a timer, or what's being recorded.

Swivl Cloud

Through the app, videos can be automatically uploaded to Swivl Cloud for editing, storing, and sharing. Swivl Cloud integrates with any LMS, the commenting tool allows for reflection, and the detailed analytics provide reporting.

> "Great resource for student observations, lesson development, and professional growth presentations."
>
> -Eric, Executive Director, Poway Unified School District

Applications

- » Flipped learning
- » Personalized instruction
- » Professional development & coaching
- » Common core coaching
- » Content delivery
- » On-demand distance learning
- » Maximizing BYOD & 1:1 initiatives

SPECTRUM INDUSTRIES INC.

This is your time.
Join now and save up to 55% with Adobe Creative Cloud 2015.

Limited-Time Promotion for Back-to-School 2015
It's all in the timing.
Act now to get 25% off when you place your VIP order for new seats by August 28, 2015.
Plus, take advantage of this same low price for up to three years when you renew.

In addition to its back-to-school promotion, Adobe will continue to reward its loyal education Cumulative Licensing Program (CLP) customers by offering the opportunity for CLP customers to qualify for up to 40% savings over a two-year period when they enroll in the Value Incentive Plan (VIP). CLP members will be upgraded based on the following VIP migrations:

> **Adobe CLP-1** customers receive **VIP Level 2**.
> **Adobe CLP-2** customers receive **VIP Level 3**.
> **Adobe CLP-3** customers receive **VIP Level 4**.

Transactional Licensing Program (TLP) education and nonprofit customers can also qualify for a 25% discount.

Join Creative Cloud for education under VIP now and get everything you need to engage and empower:

> **Access to the world's best creative apps and services** for design, web, video and photography
> **A web-based Admin Console** that makes it easy to centrally manage and deploy apps
> **Budget predictability and cost savings** with one annual or multiyear contract
> **Flexible licensing options** to meet the needs of your institution

Introducing the Trident

TECHJACKET™

UNRIVALED CHROMEBOOK AND LAPTOP PROTECTION

Help protect Chromebooks and Laptops from drops and everyday use with the new Trident Tech Jacket hard-side case. Lightweight but tough, this rugged solution features bumper guards and double-padded corners to protect device's vulnerable spots, while soft, flexible TPE hinges and port accessibility keeps devices safe and easy to operate. Fits almost any Chromebook or laptop model up to 11.6", and fits in most charging stations.

Common Core Testing & Digital Assessment

What's Coming and How to Prepare

The 2014-2015 school year has been, and will continue to be, one of the most critical school years in recent memory for the future of education. Despite facing more and more push back from states and politicians, Common Core Testing is officially taking place in 32 states this year. These tests have been designed to help all students acquire the skills and knowledge they need to achieve success at college or in the workforce. The results will likely help shape the future of education in the the United States.

Assessment Consortia Membership for 2014-2015 Testing

$360 million in federal grants has gone to groups of states developing common assessments.

- Smarter Balanced Assessment Consortium (21)
- Partnership for Assessment of Readiness for College and Careers (11 plus D.C.)
- None (18)

Minimum Requirements for Common Core Testing

Devices

Each student must have one of the following devices: Windows, Mac™, or Linux desktop or laptop computer, a Chromebook™, iPad®, Windows, or Android™ tablet. Devices must have at least 1024 x 768 display resolution. Smarter Balanced requires a 10" screen and PARCC requires a 9.5" screen.

Network Bandwidth

Smarter Balanced: Must connect to the internet with a minimum of 20 kbps available per student tested simultaneously. Local web proxy caching servers are not recommend.

PARCC: with caching a minimum of 5 kbps per student is required, without caching a minimum of 50 kbps/student is required.

Security

The device must have administrative tools and capabilities to temporarily disable features, functionalities, and applications that could present a security risk during test administration. Admins must be able to "lock down" devices when necessary.
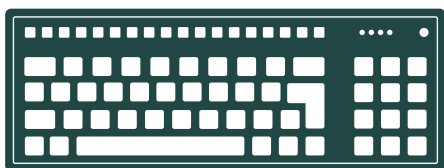

Headphones

Headphones or ear buds are required during the English portion of the tests, and for students who require text-to-speech features on the mathematics portion. USB headphones recommended, but standard headphones are permitted.

Mouse or Touchpad

A pointing device must be included. This may consist of a mouse, touch screen, touchpad, or other pointing device with which the student is familiar.

Keyboard

External keyboards are required unless specified by a student's IEP or 504 plan. Any form of keyboard that disables the on-screen virtual keyboard is acceptable, including: mechanical, manual, plug and play, and wireless-based keyboards. Note: a high-density of wireless keyboards may interfere with each other or the wireless network.

Assistive Technology required/permitted as necessary.
