WHAT IS STEAM LEARNING?

STEAM learning is an educational framework that aims to spark an interest and a lifelong love of the arts and sciences specifically focusing on hands-on study in the fields of Science, Technology, Engineering, the Arts and Math. Teaching these relevant, in-demand skills prepares students to become innovators in an ever-evolving world.

STEAM also empowers teachers to employ project-based learning that addresses each of the five disciplines and fosters an inclusive learning environment in which all students are able to engage and contribute.

The STEAM framework teaches students how to think critically, problem solve and use creativity. It develops confidence and improves students' communication skills. STEAM learning prepares students to work in fields that are poised for growth and the skills students gain from a STEAM education can be translated into almost any career.

BENEFITS OF STEAM EDUCATION

3D PRINTING + FABRICATION

A revolutionary technology that can be used to create physical objects from digital designs, allowing students to explore their creativity and produce tangible results. This technology offers unique advantages for teachers, such as increased engagement in the classroom and improved student learning outcomes.

3Doodler is the world's first 3D printing pen. It is an early introduction to 3D printing, with simple and uncomplicated technology and lesson plan breakdowns to cultivate engineering and creativity.

AGES: 6+

3Doodler Start+ Elementary & Middle

3Doodler Create+ High School

STEAM BENEFITS:

- Establishes a foundation between imagination and engineering.
- Helps students discover their own ability to make things.
- Free lesson plans covering a variety of STEAM topics.
