

# EndNote™ Site License

Provide your faculty and students with a tool that will allow them to research smarter

# Research collaboration is on the rise... are you prepared?

Research collaboration has taken on a whole new meaning in the digital age. The researchers at your institution are working with each other and with researchers all over the world, and they are all using different tools to get the job done.

When you provide site-wide access to EndNote, you will help your faculty and students **research smarter**, letting them leave behind the tedious work of creating and formatting bibliographies, finding full text articles, and searching for previously saved notes and references. With freed up time and a central reference library to work from, your researchers will be able to truly collaborate together, taking their research to new heights and ultimately raising the profile of your institution.

With one single tool, your researchers can:

## Think globally but work locally

Research collaboration is the new normal. It's up to you to make sure your faculty and students have the tools they need to harness the power of a global and multi-disciplinary research team. When your researchers can work from a single reference library with their collaborators, they will be able to **think globally but work like they're in one location**, unlocking the full potential of the team's collective mind.

## Have the right research at the right time

The competition for getting published is at an all time high and delays due to mismanaged references could mean the difference between your university getting published or someone else's. In order to ensure your researchers get to the finish line first, you need to make sure they always have the **right research the moment they need it**. When the right information is only a click away, their research will be as complete and accurate as possible, giving them a better chance of getting published.

## Reduce the risk of rejection

Your institution's performance depends on your researchers' ability to get published, but the odds are stacked against them. Journal rejection rates are high—many manuscripts don't even make it past an initial screening. When you provide EndNote, you can help **reduce the risk of rejection** due to simple bibliography and citation formatting errors or mismatched journal submissions. This means your researchers will be positioned to be reviewed based on the quality of their work, rather than a technicality, and will be one step closer to being published and cited.

## Collaborate with a global team

Work from a single reference library with up to 100 people, no matter where they are located or what organization they are affiliated with.

## Overcome research limitations

Store and share as many references, documents and files as they need—a necessity for successful collaboration.

## Stop hunting down full text PDFs

Initiate a search for full text PDFs across your institution's subscriptions and freely available sources. When the article is found, it will automatically be attached to the related reference.

## Sort through years of work in seconds

Search across reference metadata, full text journal articles, file attachments, and personal annotations and notes, to locate the research they need in just seconds.

## Cite it right the first time

Insert citations and references from their EndNote library into their manuscript and automatically build a bibliography in over 6,000 styles right from Microsoft® Word.

## Take the guesswork out of journal submission

Using EndNote online, find the journals where their research is most likely to be accepted based on an analysis of tens of millions of citation connections in Web of Science™.

## Accessibility

Off-campus students and research teams can easily access their research from anywhere and manage their EndNote library from multiple computers. When they register their online account and sync their library from desktop to online, they can access their library on any computer where EndNote is installed, online or on the iPad®.

## Technical support & training

As part of your site license, you'll get free training and support for both your resource training staff and entire community. For any level of user, there are a variety of targeted training opportunities, which include recorded trainings, live expert-led WebEx sessions and downloadable materials.

## Subscription benefits

When you subscribe to an EndNote site license, you're giving your active researchers the sophisticated reference management and bibliographic tools they require while also meeting the needs of your novice students. As part of your site license, you'll receive additional features and options in EndNote online, so your students can decide to use only the Web-based tool and still benefit from features like expanded style sets and searching online subscriptions.

## Compatibility

### Operating Systems:

Windows 7 SP1 or later | macOS 10.10 or later

### Cite While You Write™ compatibility:

Microsoft Word 2007, 2010\*, 2011, 2013\*, 2016\*

### Bibliographic formatting integration:

Wolfram Mathematica 8, Apple® Pages

---

\*32 and 64 bit

Macintosh and Windows product keys  
are cross-platform compatible.
