Universally Secure with Bradford Networks

Network Sentry from Bradford Networks is the first network security offering that can automatically identify and profile all devices and all users on a network, providing complete visibility and control.

Unlike vendor-specific network security products, Network Sentry provides a view across all brands of network equipment and connected devices, eliminating the network blind spots that can introduce risk.

Visibility

- Centralized administration and reporting from one console
- Visibility of all network devices, users and endpoints
- Unique search/locate function to quickly find a device or user

Guest Access

- Ensures secure network access for guest users
- Simplifies and automates the creation of individual or group guest accounts
- Allows self-registration through sponsor approvals and automatic account setups

Secure Onboarding

- Simplifies the process of onboarding new devices
- Dynamically configures security settings on Windows®, Mac OS X®, iOS®, and Android® devices
- Automatically configures devices' security settings and places them on a secure SSID

Centralized Management

- Empowers IT administrators with extensive management and control
- Provides a web-based administrative interface
- Isolates or disables access for non-compliant devices

Investment Protection

- Protects the general health of network infrastructure
- Adapts to changing technology environments without requiring "forklift" upgrades
- Future-proofs technology investments for years

Advanced Policy Management

- Identity-based, device-based, location-based, and time-based configurations are available
- Endpoint compliance policies allow or prohibit access based on endpoint security posture

Device Profiling

- Automatically discovers and profiles endpoint devices by type based on a wide variety of criteria
- Streamlines IT workflows with automated delegation of management responsibilities by device type

Endpoint Posture Assessment

- Enables comprehensive endpoint scans for assessing endpoint health and ensuring security policy compliance
- Provides instructions for achieving compliance for non-compliant users

Flexibility

- Architected to allow security solutions to be rolled out in phases
- Allows basic "friend or foe" access control policies, as well as more granular guest access and BYOD security policies

Contact your Account Manager at 800-279-2795 for more information about Mobile Device Management solutions from Bradford Networks.

There's
nothing like a
LapCabby

LapCabby

Looks good, works hard, costs less

Three excellent reasons to choose LapCabby for storing, charging and transporting classroom laptops, tablets, and netbooks.

They look great—unlike other cart manufacturers we make sure our units are stylish!

They help teachers—thoughtful design is user-friendly

The price is right—leads the market for value

That's why there's nothing like a LapCabby

GoCabby 16 Charge & Sync

Portable case that stores, charges and synchronizes 16 tablets with or without protective cases. Suitable for various tablets including iPad®, Android and Kindle Fire. Supportive foam and velcro straps protect tablets in transit while internal fans keep tablets cool while charging and when unit is closed.
